## SUMMARY

I'm a passionate and adaptable tech professional with a strong foundation in software development and a growing specialization in data science.

After completed my B.E. in 2021, I worked for 1.5 years as a Software Developer at UST Global (client: Intel, Bangalore), where I gained hands-on experience in development and problem solving in a real-world environment.

To deepen my technical expertise, I pursued an M.E in Embedded Systems, completed in 2024.

Driven by a growing interest in data-driven decision-making, I transitioned into the field of Data Science, where I've trained extensively in data processing, machine learning, deep learning, TensorFlow, and natural language processing and done some real time data solutions projects.

I'm currently seeking opportunities as a Data Scientist where I can apply my skills to solve meaningful problems, work with real-world datasets, and continue growing alongside passionate teams.

Let's connect if you're looking for someone who's technically grounded, quick to adapt, and excited about the future of AI and data!

## EXPERIENCE

### Software Developer

UST

Dec '21

Bengaluru, India

At UST Global, I worked as a Backend Developer on Intel's internal analytics and dashboarding tools. I was part of a cross-functional team responsible for building scalable, data-driven applications that supported Intel's business intelligence and monitoring systems. Major Responsibilities:

- Designed and managed SQL Server databases, including the creation of tables, views, and complex stored procedures to support real-time data processing.
  - Developed backend APIs using C# and .NET for integration with internal dashboards used by Intel's engineering and analytics teams.
  - Built console applications to automate data monitoring tasks, including:
  - Real-time anomaly detection in operational data.
  - Triggering SMTP email alerts to notify stakeholders about critical system events or data inconsistencies.
  - Worked closely with front-end teams and analysts to understand data requirements and ensure smooth API integrations.
- Team & Collaboration:
- Collaborated with a talented team of software developers, database engineers, and QA analysts across both UST and Intel.
  - Participated in agile ceremonies including sprint planning, daily stand-ups, and retrospectives.
  - Reported to the project lead and regularly interacted with Intel's product owners and system architects.
- Key Accomplishments:
- Successfully deployed multiple backend services that supported high-traffic internal dashboards used by Intel teams globally.
  - Reduced manual data review efforts by implementing automated detection scripts and real-time email alert systems.
  - Improved stored procedure performance by 30% through query optimization and indexing strategies.
  - Consistently delivered clean, maintainable code under tight deadlines, earning appreciation from both UST and Intel stakeholders.
- Technologies Used: C#, .NET Framework, SQL Server, REST APIs, SMTP (MailKit), Git, Visual Studio.

## EDUCATION

**Master's degree, Embedded Systems in Embedded Systems,** Hindusthan College of Engineering and Technology Coimbatore (GPA: 8.38)

Sep '22 — Sep '24

Coimbatore, India

- Specialized in advanced embedded technology, system design, and integration. Gained strong expertise in hardware-software interfacing and embedded software development.
- Final year project: "Generating Artistic Images through Neural Style Transfer Using Machine Learning and Image Manipulation Techniques"
- focused on applying AI-driven image transformation techniques. Published research in an international journal of standard academic recognition.

**BE, Electronics and Communication Engineering in Electronics and Communication Engineering,**

Aug '17 — May '21

Hindustan institute of technology (GPA: 8.13)

Coimbatore, India

- Gained core knowledge in software methodology, digital systems, and engineering fundamentals.
- Participated in technical mini-projects, and academic seminars to enhance practical understanding.

CERTIFICATIONS

Certificate of Publication, International Journal of Scientific Research in Engineering and Management
