EDUCATION

Syracuse University

Master's Degree - Computer Science

Syracuse, New York

August 2022 – May 2024

Vidyalankar Institute of Technology

Bachelor's Degree - Computer Engineering

Mumbai, Maharashtra

July 2016 – May 2020

EXPERIENCE

Software Development Engineer - Research Intern

Syracuse University

May 2024 – Present

Syracuse, New York

- Architected full-stack application using React, Flask, and Python, achieving a 30% boost in performance by leveraging Aiven-hosted PostgreSQL for scalable data storage with psycopg2, and enhancing load times with Redis for image caching
- Optimized processing efficiency with AWS Lambda for serverless image handling and Amazon S3 for scalable storage, reducing processing time by 25% and improving system scalability
- Strengthened reliability and response times by implementing Netlify for frontend hosting, Vercel for backend hosting, and automated CI/CD pipelines, reducing deployment downtime by 40% and ensuring frictionless client experience

Software Engineer

Vistaar Technologies

July 2020 – August 2022

Mumbai, Maharashtra

- Refactored diverse solutions in Java, JavaScript, Shell, and Perl to address intricate customer-reported issues and migration, harnessed IAM, EC2 and RDS for scalable infrastructure, reducing resolution time by 30%
- Employed Spring Framework for code fixes and enhancements across microservices architecture, leveraged Kibana and CloudWatch for log monitoring, leading to 20% increase in customer satisfaction
- Coordinated with teams to refactor code, ensuring 100% adherence to coding standards and improving maintainability by 25%, in addition, leveraged SQS for efficient message queuing and Glue for automated data integration workflows

PROJECTS

BrevityAI

December 2024 – February 2025

- Devised an efficient web scraping and summarization pipeline using Node.js, RabbitMQ and Playwright for end-to-end testing, implementing asynchronous message processing to handle large-scale data ingestion, reducing processing latency by 40%
- Implemented robust backend system integrating Cassandra (Astra DB), Google Gemini AI and Express and AI-driven text summarization to improve efficiency by 30%, while incorporating Next.js to enable an interactive frontend for flawless UX

DocuQuery

November 2024 – January 2025

- Innovated RAG based document retrieval system using LangChain, Ollama and ChromaDB, enabling semantic search on PDFs by leveraging FastEmbed embeddings and PostgreSQL backed vector storage, improving query accuracy by 40%
- Boosted text chunking with RecursiveCharacterTextSplitter and established scalable retrieval pipelines using AWS Lambda, FastEmbed and Docker, reducing document indexing time by 30%

Shrinkify

September 2023 – December 2023

- Engineered and deployed Golang backend anchored on Vercel, supported by PostgreSQL and Redis, achieving 40% reduction in API response times, reducing database dependency by 50%, ensuring high availability & fault tolerance across the system
- Streamlined deployment pipelines with automated CI/CD workflows on Vercel and Docker, achieving 100% uptime during updates and reducing deployment cycles by 30%, while integrating Next.js - TypeScript frontend for cohesive user experience

ColorJam

June 2023 – August 2023

- Constructed web application for dominant color extraction using Python, K-Means clustering and React, posted on PythonAnywhere, enhancing UX by 20% with a responsive and performant design
- Integrated AWS Lambda, S3, and MongoDB Atlas for serverless image processing and efficient NoSQL data management respectively, optimizing performance and scalability

TECHNICAL SKILLS

Languages : Java, Python, TypeScript, JavaScript, C++, C#, Golang, Kotlin, Dart, SQL, Perl, Shell

Frameworks : React, React-Native, Flutter, Flask, Spring, SpringBoot, Hibernate, Node.js, jQuery, Next.js

Tools : IssueTracker, S3, EC2, Lambda, Firebase, Android Studio, GitHub, PowerShell, Kibana, SQS, Glue, Docker

Databases : MongoDB, OracleSQL, PostgreSQL, SQLite, Microsoft SQL, MySQL, DynamoDB, Amazon RDS, Redis

Certifications : Oracle Certified Associate Java Programmer (Java-8), Generative AI with Large Language Models

EXTRACURRICULAR

Augmented to open source projects, with 20+ Pull Requests merged, showcasing collaborative coding skills

Administered in Smart India Hackathon by creating voice prescription app for doctors & reduced errors by 20%
