## PROFESSIONAL SUMMARY

**Full Stack Software Engineer** with 4+ years of experience building scalable, high-performance web applications and cloud-native software solutions. Skilled in **React.js, Python, Node.js, GraphQL, and performance optimization**. Proven ability to lead teams, implement robust testing, and deliver ahead of deadlines in Agile environments. **Graduated with a Master's in Computer Science**, having contributed to real-world projects across frontend and backend systems.

## TECHNICAL SKILLS

- **Programming Languages:** JavaScript, TypeScript, C, C++, Python, Java, HTML, CSS.
- **Frameworks/Libraries:** React.js, Next.js, Redux, Node.js, Express.js, Webpack, Auth0, NPM.
- **UI/UX Design:** Figma, Canva, Responsive Web Design, Material UI, Tailwind CSS, Cross-browser Compatibility.
- **Data & API Management:** GraphQL, RESTful APIs, SQL, PostgreSQL, NoSQL, Redis, MongoDB, DynamoDB..
- **Testing, Development Tools & Others:** Jest, Enzyme, Cypress, Jenkins, SonarQube, CI/CD, Agile, SDLC, Code Reviews, Performance Optimization, Unit Testing, Integration Testing, Firebase, Docker, Git, Bitbucket, AWS, Docker.

## RELEVANT PROFESSIONAL EXPERIENCE

**Bharti Airtel Pvt. Ltd.** | *Senior Software Engineer* **Mar 2022 - Jul 2023**

- Initiated the **upgrade of React Hook Form from v5 to v7**, managing the process from planning to implementation. Refined form handling and validation, **boosting performance by 25%** and enhancing maintainability.
- **Led** a team in architecting and building a **responsive, mobile-first bill payment platform** using React.js and Redux. Delivered **20% ahead of schedule**, ensuring cross-browser compatibility, UI/UX consistency, and adherence to Agile methodologies.
- **Leveraged Amazon S3** to store and manage large volumes of media files, such as images, videos, and backups, ensuring efficient data retrieval and high availability for web applications, while optimizing performance and cost.
- Governed code quality standards via rigorous peer reviews on **5000+ lines of code**, identifying and rectifying **75+ critical bugs**, boosting application **stability by 20%** and maintainability.

**Ericsson India Global Services Pvt. Ltd.** | *Software Engineer* **Jul 2019 - Feb 2022**

- Transformed a monolithic .NET dashboard into a React-based microservice architecture, improving **page load speeds by 60%** and facilitating seamless **cross-browser functionality for 5,000+ users**.
- Collaborated with a 4-member team to implement Redis caching and AWS Elastic Load Balancing, maintaining **99.9% uptime** during peak traffic to support over **50k concurrent users**, optimizing cache hit ratios for improved data retrieval.
- Revamped the application's front-end using React, implementing lazy loading and code splitting techniques, **reducing initial load times by 60%**.
- Engineered **comprehensive unit tests using Jest**, achieving **85% test coverage** and reducing **production bugs by 25%**, significantly strengthening overall **code reliability and system stability**.

**Ericsson India Global Services Pvt. Ltd.** | *Software Intern* **Feb 2019 - Jun 2019**

- Collaborated on NodeJS and ExpressJS projects to resolve key data retrieval issues, optimizing queries and indexing to **improve query efficiency by 30%** and enhance system reliability during production.
- Reduced **API call frequency by 20%** using React Memoization to minimize unnecessary API calls and reduce data fetching delays.

## EDUCATION

**University of Utah** **Aug 2023 - May 2025**

*Master of Science, Computer Science (GPA: 3.66/4)*

- **Coursework:** Advanced Operating Systems, Software & Systems Security, Graduate Algorithms, Parallel Programming

**Thapar University** **Jul 2015 - Jun 2019**

*Bachelor of Science, Computer Science (GPA: 8.55/10)*

- **Coursework:** Object-Oriented Programming, Data Structures and Algorithms, Database Management Systems, Machine Learning

## TECHNICAL PROJECTS

### SignSpaces

- Managed the development of an interactive educational platform for sign language learning, creating customized student and teacher dashboards that **improved Lighthouse Score by 40%** and enhanced learning outcomes.
- Formulated a secure authentication system using Firebase Authentication, utilized React Router for seamless navigation, and Stripe for secure in-app course purchases, enabling personalized user experiences and laying the groundwork for future monetization.

### CineflixGPT – AI-Powered Video Recommendation Platform

- Architected a **React-based(using Typescript)** web app integrated with **Gemini-1.5-flash** and TMDB APIs to provide AI-powered, personalized movie recommendations.
- Designed modular components for high performance, optimizing search UX with prompt engineering, **debouncing**, and API orchestration. Focused on **responsiveness, reducing latency** for enhanced user experience.
