WORK EXPERIENCE

Software Developer

Tata Consultancy Services (TCS), Toronto, ON

January 2023—Present

.Net Developer (Toronto Dominion (TD) Bank: October 2023 - Present)

- Providing support to the existing applications to ensure timely bug fixes and deployments
- Developed .Net 6 web and console app to parse, save and visualize the text data
- Developed pagination algorithm while upgrading old .Net app improving the app performance by 40%
- Developed test cases and maintained .NET Core and VB.NET web applications
- Used VeraCode Scan for enterprise code scan before deployments
- Review code changes for deployments and work as a Git Master to the team
- Integrated CyberArk for credential management and implemented Log4net in .Net 8 Apps
- Wrote optimized stored procedures in MSSQL for improved usability
- Utilize JIRA for task coordination, Confluence for documentation, and Bitbucket for version control

Java Developer (Loblaws: January 2023 – September 2023)

- Designed, developed and maintained Spring web application using microservice architecture
- Implemented restful APIs using Java and consumed them on the client side using React.js
- Fixed bugs, wrote unit tests and feature documentation

Back-end Developer (.NET Back-end Developer)

February 2022—November 2022

Sekure Merchants Solutions, Montreal, QC

- Developed and maintained domain-driven design .NET Apps using ABP Framework with Agile methodology
- Tested and developed Rest APIs to be consumed by the CRM website
- Developed plugin components for Twilio Flex using React and creating flows in Twilio Studio
- Used Azure DevOps for version control (Git), task handling and deployments on Azure

Systems Developer (.NET Full-Stack Developer)

September 2021—February 2022

Windsor Family Credit Union (WFCU), Windsor, ON

- Developed .NET web apps with domain-driven design for financial institutions in an Agile environment.
- Utilized Azure DevOps for version control, task coordination and deployments.

Start-up Owner

May 2021—August 2021

2021 Summer RBC EPIC FOUNDERS PROGRAM (EPI Center, Windsor, ON)

- Worked on my final-year project in React Native with Google Firebase back-end and NoSQL DB
- Went through a startup process with my colleagues to seek the solution for rental properties

Systems Developer (.NET Full-Stack CO-OP Student)

January 2020 – March 2020

Windsor Family Credit Union (WFCU), Windsor, ON

- Developed .NET Web App portal to handle online cheque requests and orders
- Developed a JavaScript plugin to search the database asynchronously from .NET API
- Deployed the Web Apps on IIS Server, documented the applications and used Turtle SVN for version control

IT and Network Technician Intern

June 2019 – September 2019

Nature Fresh Farms, Leamington, ON

- Connected new devices to the network, managed existing ones, and ensured switch, router, and device connectivity through troubleshooting.

Teaching Assistant

September 2018 – April 2021

University of Windsor, Windsor, ON

- Conducted lab tutorials and assisted students in the learning process
- Participated in the assessment process and provided effective feedback to the students

EDUCATION

BSc[H] Computer Science with Software Engineering Specialization

January 2018 – April 2021

Minor in Business Administration

The University of Windsor, Windsor, ON

CURRENT PROJECT(S)

Artistic Whiz Inc. ([ArtisticWhiz Inc.](#))

January 2022 – Present

- Developing an Ecommerce Website for a home-base business for maximum customers reach
- A complete application built using .NET 6, React.js, MySQL and Stripe which can be scaled and deployed on any platform

ACADEMIC PROJECTS

Tenlo (*Startup*)

- Built a React-native mobile app for tenants and landlords to communicate as a final year project.
- Front-end is built using React native while back-end is handled by Firebase real-time database

Software Testing

- Software verification and testing using JUnit, NUnit, Selenium and Python

Web Development

-Microservices API: Built an API using .Net to shorten URL for a microservices project and hosted it on MS Azure

-Story Pitch website: Built a website to pitch my story to the producers to finance the short film that I wrote

-Student Academic Helping site: Group project in React.js helping student in their academic decisions (prototype only)

Academic Awards

- Dean's Honor Roll, Alumni Association Memorial Scholarship, University of Windsor In-course bursary
