

Jyothirmayee Rao

(959) 895-5812 | raojyothirmayee21@gmail.com | [Tableau](#) | United States

SUMMARY

Data Analyst with over 4 years of experience delivering end-to-end BI solutions across AWS and Azure. I specialize in automating reporting workflows and have collaborated extensively with cross-functional teams to define KPIs, gather requirements, and deliver actionable insights—especially in fast-paced Agile environments using JIRA.

EDUCATION

Northeastern University | Master of Science, Information Systems | Boston, USA

Sep 2022 - May 2024

TECHNICAL SKILLS

Languages : SQL, Python (PySpark, Pandas, NumPy, Seaborn, Matplotlib)
Databases : MySQL, MSSQL, PostgreSQL, Oracle DB, Snowflake
ETL Tools : Alteryx, Talend, Databricks, AWS Glue, Azure Data Factory
BI Tools : Tableau, Power BI, Qlik Sense, MS Excel, Google Analytics, ER/Studio, Erwin Data Modeler
Cloud stack : S3, Lambda, Step Functions, Cloud Watch, Glue, Redshift, Azure Data Lake, Data Factory, Synapse Analytics
Other : Azure DevOps, Git, Docker, Jira, Microsoft Office

EXPERIENCE

Data Analyst, Community Dream Works | Boston (Remote), MA

Sep 2024 - Present

- Managed **A/B testing** on campaigns and landing pages, driving a 12% improvement in engagement and optimizing the journey
- Created interactive **Tableau dashboards** to visualize the impact of energy efficiency of 30 underserved communities
- Conducted **root cause analysis** on outreach efforts, providing insights to boost community engagement and participation
- Analyzed 5+ community development initiatives and outreach strategies using Python, driving a 20% increase in engagement

Data Analyst Intern, Travelers | Hartford, CT

Jul 2024 - Sep 2024

- Collaborated with Data Scientists to deploy customer risk levels and potential fraud propensity ML Model to **Amazon SageMaker** in (Bring Your Own Container) BYOC approach ensuring enhanced scalability for real-time predictions
- Constructed and released modular transformation workflows with AWS Glue to transform **1M+ insurance claims**, loading structured data into **Redshift**
- Played a key role in building a **statistical model** to analyze and flag **potentially fraudulent insurance claims**, achieving a 92% accuracy rate and helping to prevent \$500K in annual fraudulent payouts.
- Optimized** load time of **Tableau dashboards** by **30%**, enhancing decision-making speed for **50+ stakeholders** in claims analysis

Data Analyst, Tata Consultancy Services | Mumbai, India & Montevideo, Uruguay

Jul 2019 - Oct 2022

- Built end-to-end ETL pipelines using **Apache Airflow**, and **Azure Data Factory**, streamlining ingestion from CRM, ERP, and APIs, reducing manual processing by 70% and improving real-time data availability.
- Engineered and improved **relational data models** in **Snowflake** and **SQL Server**, implementing fact and dimension tables with clear business logic, enabling cross-functional teams to perform ad-hoc analyses up to 35% faster
- Streamlined data analysis** using **Excel** formulas, pivot tables, and VBA macros, reducing reporting time by **25%**
- Analyzed data discrepancies**, delivering insights to senior leadership to resolve critical issues and cutting data errors by **20%**
- Developed a **customer retention model** implementing statistical techniques to analyze client behaviour for a key client with 85% accuracy in predicting customer churn and reducing churn rates by 10% through targeted retention strategies.
- Led the creation of the **weekly organizational metrics scorecard**, presenting data-driven insights to leadership and ensuring alignment with business objective

ACADEMIC PROJECTS

New York Crash Dataset| Talend, Power BI, Alteryx, MS SQL, ER/Studio

Apr 2023

- Designed **dimensional model** incorporating SCDs to analyse New York Motor Vehicle Collisions dataset
- Built interactive dashboards on **Tableau** and **Power BI** around 8 KPIs such as crashes by severity, location & type
- Built ETL pipelines using Alteryx and Talend to process, transform and load over 1.8 million records into Oracle DB

Electoral Database Management System| Oracle DB, PL/SQL, ER/Studio

Dec 2022

- Architected an Entity-Relationship (ER) diagram** for an Electoral Database Management System, ensuring efficient data modeling and streamlined handling of voter and election data, improving data retrieval efficiency by 25%
- Developed SQL procedures, functions, and triggers** to automate processes such as voter registration, ballot counting, and data validation, improving system efficiency by **30%**
- Implemented role-based permissions and data integrity constraints**, ensuring security and accuracy of sensitive electoral data
