EDUCATION

Indiana University Bloomington

Master's in Data Science, CGPA - 3.8

Bloomington, Indiana, USA

2023 - 2025

VIT University

Bachelors in Computer Science Specialization in Data Analytics

Amaravathi, India

2017 - 2021

SKILLS

Programming Languages: Python, PL/SQL, R, NoSQL, JAVA, C++

Databases: MySQL, PostgreSQL, SnowflakeSQL, Dbt, Oracle DB, MongoDB, BigQuery

AWS: EC2, EMR, S3, Sagemaker, Lambda, Athena, Redshift

Tools: R studio, Tableau, Power BI, Databricks, Snowflake, Microsoft Office, Git, Docker, JIRA

Big Data Processing: Apache spark, Kafka, Apache Flink, Hadoop

EXPERIENCE

Research Assistant

Kelley School of Business, Indiana University Bloomington

May 2024 - Present

- Conducted a comprehensive evaluation of a nurse workload tool across multiple **IU Health** facilities, resulting in evidence-based recommendations to optimize nurse and patient outcomes.
- Implemented a data-driven approach evaluating the effects of workload management on team performance; findings are now utilized by leadership to inform policy changes affecting **500+** IU healthcare employees.
- Generated academic and practical insights through the development of **Tableau** dashboards, informing best practices for implementing and scaling workload tools in health systems.

Programmer Analyst

Cognizant Technology Solutions, Bangalore, India

Oct 2021 - Jan 2023

- Developed and implemented innovative data metrics and analytics reports using **PySpark** for the commercial division of **Capital One** banking, resulting in a notable **3%** increase in quarterly revenue.
- Optimized data analysis by migrating **Hive SQL** queries to **Spark SQL**, accelerating query performance and scalability. Developed and visualized key data metrics in both Tableau and AWS Quicksight.
- Collaborated with cross-functional teams to identify areas for improvement in the **commercial banking process**, leading to a **8%** reduction in processing time.

PROJECTS

ACS Census Data Analysis

May 2024 - Present

Kelley School of Business, Indiana University

- Utilized the **ACS API** to extract comprehensive demographic and socioeconomic data, developing Python scripts to automate dataset extraction and reduce report generation time from over 70 minutes to under 30.
- Cleaned and preprocessed large-scale ACS datasets with Python, enabling advanced statistical analysis and insightful data visualizations for research and decision-making.

CSRDS - Commercial division Data Engineer

Oct 2021 - Jan 2023

Capital One, West Virginia

- Spearheaded efforts to enhance the performance of the CSRDS application, a comprehensive one-stop customer data portal, achieving an impressive **6%** reduction in query response time and significantly improving efficiency.
- Managed various Metric tasks for Capital One's data reporting portal, MDAT. Effectively updated views for metrics on **Snowflake** and subsequently published the data using **AWS Quicksight**.
- Orchestrated daily, weekly, and monthly **Databricks** jobs to update databases, ensuring timely **Tableau** dashboard refreshes and streamlining data visualization for efficient decision-making.

Face mask detection using Deep Learning

Jan 2021 - Jun 2021

VIT - AP

- Developed a real-time face mask detection solution using deep-learning neural networks, integrated with hardware for public spaces.
- Streamlined the development process with **Albumentations**, utilizing optimized functions from **OpenCV** and **NumPy** for efficient computer vision tasks.
