3601 Blue Jay Way, Eagan, Saint Paul, MN, 55123, USA

Education:

Master of Science: Data Analytics

Concordia University, Saint Paul, MN, USA

CGPA: 3.20/4

May 2024

Bachelor of Technology: Computer Science & Engineering

Vaagdevi College Of Engineering, Warangal, India

CGPA: 8.87/10

May 2021

Work Experience:

Cyber Security Analyst, Infosys Ltd, Hyderabad, India

Aug 2021 - Nov 2022

- Worked on Infrastructure security- vulnerability management, Application Security, Network alerts-end point security, and outbound traffic Management.
- Performed regular **vulnerability scans** using tools such as **Qualys and Qualys VMDR** to identify and assess security weaknesses within network infrastructure and applications.
- Prepared detailed remediation reports outlining identified vulnerabilities, recommended solutions, and prioritized action plans to address security risks effectively.
- Utilized Qualys Asset Management module to effectively track and manage IT assets, ensuring accurate inventory, identifying vulnerabilities, and implementing remediation strategies based on asset criticality and risk assessment.
- Researched and responded to **zero-day vulnerabilities** and **emerging threats**, ensuring timely patching and mitigation.
- Thoroughly followed threat intelligence feeds and platforms to stay updated on emerging threats and attack patterns.
- Managed the remediation process by prioritizing and tracking vulnerabilities to closure within defined SLAs.
- ServiceNow for incident and change management, efficiently handling tickets, facilitating collaboration among cross-functional teams.
- Collaborated with cross-functional teams to develop and implement remediation plans, significantly reducing high-risk vulnerabilities.
- Deployed Qualys cloud scanner on the cloud servers to get the real time vulnerabilities and remediation reports.
- Regularly Monitored and analyzed security alerts from TrendMicro's Intrusion Detection Systems (IDS) and Intrusion Prevention Systems (IPS).
- Investigated and responded to security incidents, including brute force attack alerts, ensuring timely resolution.
- Leveraged the Zscaler tool to manage outbound traffic from cloud servers and enforce security policies, ensuring secure and compliant data transmission.
- Strong communication skills, with the ability to explain technical concepts to a non-technical audience.
- Worked on Vulnerability Management, Firewalls, End Point security, Setting up Dashboard and alerts.

Certifications

- **CCNA(CISCO)**: Switching, Routing and Wireless Essentials.
- https://www.credly.com/badges/db178b0d-a8a9-435d-83ee-9e4f9cf0203f/linked_in_profile
- **Ethical hacking, Vulnerability management, Cybersecurity foundations** - by Purdue University & Infosys
- <https://www.credential.net/71a31d76-d0a2-4d8b-827e-802e72dee3a8>
- <https://www.credential.net/b5b8c5d1-cca0-4f5c-aebf-374be74e363b>
- **Certified Data Analyst** by DELL EMC.

Skills:

Cyber Security skills: **Vulnerability Assessment, Penetration Testing, SoC, SIEM, IDS/IPS**

Programing/Scripting Languages: **Python, Java, C, HTML, CSS, OOP**

Database Languages: **SQL, MYSQL**

Security tools: **Qualys VMDR, Qualys, Trend Micro, Zscaler**

Data analytics & Visualizations: **Microsoft Excel, Tableau, matplotlib, NumPy, Pandas, scikit-learn.**

Academic Projects:

The customer behavior analysis in the retail industry:

May 2024

- Conducted a comprehensive analysis of customer behavior within a retail environment to enhance marketing strategies and optimize customer experience. Processed vast amounts of datasets utilizing data analytics tools.
- Created visualizations of different categories to understand the data and the needs.
- Utilized statistical methods and machine learning algorithms to identify patterns and trends in customer purchasing behavior.
- Presented findings and recommendations for drive data-driven decision-making.
- Tools & Technologies: Jupyter Notebook, Python – NumPy, Pandas, scikit-learn.

A Restaurant website integrated with chatbot and Facebook Messenger.

Dec 2020

It enables seamless online reservation, menu exploration, order placement, customer support, feedback collection, and marketing. Customers can check table availability, make reservations, and receive confirmation via Messenger. Customers can seek information, leave feedback, and receive promotional messages directly through Messenger.

Technologies used: HTML, CSS, JavaScript for front-end development of the restaurant website. Facebook Messenger API for integrating chatbot functionality through IBM Watson.

Achievements

- Served as **Chairperson, Joint secretary, and volunteer** at the **IEEE student branch chapter computer society** of Vaagdevi College of Engineering in my 2 years of IEEE tenure in my bachelor's studies.
- Stood among the Top 130 students in an IEEE programming competition called **IEEEExtreme**.
- Worked as **Co-Editor-in-Chief** for IEEE Hyderabad Section Computer Society's first-ever Newsletter called "**Samachar**".

Work Authorization: OPT and extended STEM OPT

I hereby declare the above information is true up to my knowledge.
