

Rishi Rudrabhatla

+1 7205604075 | rudrabhatlarishi1@gmail.com | <https://www.linkedin.com/in/rishi-rudrabhatla/>

SKILLS

Programming languages

: Python, Java, JavaScript, C++, C#.

Web Development

: HTML, CSS, JavaScript, React.js, Angular, Node.js, MySQL, MongoDB.

API Integration and Web services

: RESTful API integration, Apache HttpClient/HttpURLConnection.

Other skills

: SDLC, Error Handling and Exception Management, GUI Development (Java Swing/JavaFX), JSON and XML Parsing, Version control with Git, Tableau, Power BI, Data Structures, SQL, PostgreSQL, Database Management, Algorithms, Computer networks, MATLAB, Arduino UNO programming.

EXPERIENCE

Product Development Intern, Telangana Hub (T-Hub), Hyderabad, India.

Sep 2021 – Jun 2022

- Took on a mentoring role during the Product Development Internship, offering guidance and assistance to junior interns.
- Shared knowledge in product development methodologies, mentoring on aspects such as market analysis, prototyping, testing, and effective collaboration methods.
- Cultivated a cohesive and efficient team atmosphere, playing a key role in the internship program's accomplishments.
- Skilled in Python, Java, HTML, and SQL languages. Employed Python and Java for various development assignments, showcasing proficient programming abilities.
- Leveraged SQL for efficient data management and manipulation, enabling data-driven decision-making processes.

Full Stack Development Intern, Besant Technologies, Bangalore, India.

Mar 2021- Aug 2021

- Completed intensive training in HTML, CSS, JavaScript for web development.
- Executed diverse projects in Frontend, Backend, and Database development.
- Developed and deployed a full-stack online bookstore application, integrating technologies such as React.js, Node.js, Express.js, and MongoDB.
- Achieved a 40% increase in user engagement within the first month post-deployment.
- Implemented a secure user authentication and authorization system, reducing unauthorized access attempts by 60%.
- Optimized backend database queries, resulting in a 20% improvement in application performance and response times.

Embedded Systems Intern, Electronics Corporation of India Limited (ECIL), Hyderabad, India.

May 2018 - Jun 2018

- Engineered an embedded system using Arduino Uno microcontroller and ultrasonic sensors to detect fence breaches.
- Achieved an average detection accuracy of 95% in field tests, ensuring reliable perimeter security.
- Integrated infrared motion sensors for supplementary detection, reducing false alarms by 80%, enabling real-time response to breaches within 2 seconds.
- Reduced power consumption by 50% through optimized firmware and sleep mode implementation, ensuring prolonged battery life for remote deployment.

PROJECTS

Weather Forecasting Application Development with API Integration and Git Version Control.

Feb 2024

- Developed a Java application to fetch real-time weather data from public APIs with a response time of under 2 seconds.
- Implemented a user-friendly interface allowing users to input their location and view weather forecasts.
- Integrated Git version control to track project changes.
- Demonstrated proficiency in Java programming, API integration, user interface design, and version control practices.

Advanced Sales Analytics Dashboard

Jan 2024

- Developed a real-time sales analytics dashboard using Power BI, consolidating data from 10+ regions and 5 product categories.
- Integrated CRM, transactional, and marketing data, reducing data retrieval time by 30% and providing a unified view of sales performance.
- Implemented predictive analytics and cohort analysis techniques, contributing to improved sales forecasting accuracy.
- Designed interactive dashboards with Tableau, enhancing user engagement and supporting data-driven decision-making processes.

Housing Data Analysis of the US (Extraction, Transformation, and Analysis).

Sep 2023

- Collected, stored, and validated data in MongoDB, achieved a data accuracy rate of 98% through validation procedures.
- Engineered and managed a dynamic SQLite database infrastructure, leveraging Python, SQLite, Pandas, and Matplotlib.
- Enabled iterative adjustments which reduced database query time by 20%.

BSC Budget Plan using Power BI.

Feb 2023

- Developed a comprehensive strategy for Big Store Company, utilizing Power BI to create a budget plan and outlined actionable steps to achieve a 5% growth goal.
- Emphasized growth opportunities within the audio and video electronics market for the company.
- Optimized Power BI data load time from 16 minutes to 2.5 minutes.

CERTIFICATIONS AND HONORS

- AWS Certified Cloud Practitioner (CLF-C01).
- Full Stack Development.
- Got nominated for the best outstanding student for spring 2024 graduation with a grade of 3.97.

EDUCATION

Masters in Information systems (MIS)

University of Colorado, Denver

May 2024

Bachelor of Engineering- Electronics and Communications

Chaitanya Bharathi institute of technology, Hyderabad, India.

Jun 2021
