
RAJENDRA SHRESTHA

Flagstaff, Arizona ♦ C:9286795670 ♦ rs2448@nau.edu ♦ <https://www.linkedin.com/in/rajendra-shrestha-244603b3/>

SKILLS

MATLAB	Solid Works
Python	AutoCAD
R/R Studio	CATIA
C	FEniCS
Arduino	Meteodyn
Lab View VI	ANSYS

WORK HISTORY

Teaching Assistant, 01/2018 to 12/2019

Northern Arizona University – Flagstaff, United States

- Conducted lab on Mechanical Measurement Methods
- Supervised students class project on the instrumentation of measuring mechanical parameters
- Graded lab reports and home works of Fluid Dynamics, Mechanical Measurement Methods and Material Science

Mechanical Engineer, 01/2017 to 08/2017

CG Foods (Nepal) Pvt. Ltd. – Kathmandu, Nepal

- Managed and planned the maintenance of noodle plant, juice plant, brewery plant, cement plant, and snacks plant
- Verification of technical specification of spare parts required for the maintenance of plants

HVAC Engineer, 08/2016 to 01/2017

Huawei Technologies Nepal – Kathmandu, Nepal

- Designed HV AC for server room of Nepal Telecom
- Maintenance of precision type air-condition used in the server of telecom to make network intact throughout

Mechanical Engineer, 11/2014 to 08/2016

CG Brewery (Nepal) Pvt. Ltd. – Kathmandu, Nepal

- Managed and planned the maintenance of the brewery plant and captive power plant
- Regulated techno-commercial aspects of the expansion of the brewery plant

EDUCATION

Master of Science: Mechanical Engineering, 12/2019

Northern Arizona University - Flagstaff, AZ

- Thesis: Uncoordinated and Price Incentive Based Load Profiles due to Electric Vehicle Charging
- GPA: 3.88

Bachelor of Science: Mechanical Engineering, 11/2014

Institute of Engineering, Tribhuvan University - Kathmandu, Nepal

- Capstone Project: Design, Modeling and Testing of Cyclone Separator

PROJECT, REPORT AND PAPERS

- Paper on “ Distributed Wind Resource Assessment for Small, Kilowatt-Sized Turbines using Computational Flow Modeling Software”
- Project on “Development of a Feeding Assistive Robot Using Six Degree of Freedom Robotic Arm”
- Project on “Simulation and Control of Virtual Flight Vehicle”
- Project on “Non-Linear Analysis of Two Degree of Freedom Pendulum”
- Project on “Flow in a Long Bounded Channel Subject to Shear Stress”
- Project on “Aerodynamic Design for a Rotor Blade (Betz-optimum)”

POSTER PRESENTATION

- Electric Vehicle–Grid Integration: A Review of Opportunities and Issues (2018 UVIG Spring Technical Workshop)
- Electric Vehicle–Grid Integration: A Review of Technology (2018 UVIG Spring Technical Workshop)
- Electric Vehicles Uncoordinated and Coordinated Charging Behaviors on Power System Operation (2019 Arizona Student Energy Conference)
