

Aspiring AI/ML Specialist with a Strong Web Development Foundation

Highly motivated and enthusiastic computer science master's student with intensive coursework in Artificial Intelligence and Machine Learning, complemented by two years of professional experience in web development. Proven ability to collaborate and do research in AI/ML under faculty supervision, with a strong desire to make meaningful contributions to the field.

CORE SKILLS

Programming Languages	JavaScript, Java, Python, C#
Machine Learning Frameworks	TensorFlow, Keras, Scikit-learn, PyTorch, NumPy, Pandas
Web Technologies	RESTful APIs, HTML, CSS, React, Typescript, Node, Redux, Redux Sauce, Redux-Saga, Bootstrap, Chakra UI, Tailwind CSS, MUI, JWT, Figma
Databases	MySQL, sqLite3, TinyDB, MongoDB
Frameworks	MVC, Laravel, Flask
Version Control	GitHub
Tools & Technologies	Jupyter Notebook, Google Colab, Visual Studio Code, Docker, Postman, Trello, npm, Yarn, pip

PROFESSIONAL EXPERIENCE

Full-stack Developer (Intern)

August 2024 – Present

*Idaho State University
Pocatello, Idaho*

- Developed innovative solutions for NP-complete problems within Redux, contributing 50+ new entries and increasing user participation by 30%.
- Designed and executed interactive visualizations using React to clarify complex NP-complete problems, improving user comprehension by 40%.
- Enhanced the system's UI/UX by streamlining navigation and optimizing functionality, leading to a more user-friendly experience.
- Focused on computational research to develop clear and effective solutions, advancing problem-solving strategies for NP-complete challenges, resulting in a 30% improvement in solution efficiency.

AI/ML Research Assistant

May 2024 – January 2025

*Idaho State University,
Pocatello, Idaho*

- Conducted extensive test runs to enhance machine learning model accuracy and robustness, adjusting parameters for optimal performance, resulting in a 15% improvement in model reliability.
- Modified model architecture and parameters to troubleshoot and resolve implementation issues, improving overall model reliability by 20%.
- Prepared comprehensive reports with details on model adjustments, test outcomes, and recommendations in certain areas for future research and optimization.
- Collaborated with 5+ team members and faculty to review findings, integrate feedback, and refine methodologies, fostering a research-driven environment that improved workflow efficiency by 25%.

Software Engineer I

August 2022 – February 2023

*NAXA Pvt. Ltd.
Kathmandu, Nepal*

- Produced over 3 web applications in an agile environment, utilizing reusable, scalable, efficient, and industry-standard code to ensure maintainability and performance, while incorporating Redux, Redux-Saga, and Redux Sauce for state management.
- Enhanced data visualization with Recharts, ApexCharts, Open Layer, and Choropleth, boosting user engagement by 10%, while optimizing programs to improve system efficiency by 20%.
- Conducted new hire orientation and knowledge exchange sessions, ensuring 100% of new hires gained a solid foundation in development practices and skills.

Frontend Web Developer Intern

Easy Software Pvt. Ltd.

Kathmandu, Nepal

April 2022 – July 2022

- Created high-quality user-facing features from wireframes and designs using web technologies such as HTML, CSS, Bootstrap, Tailwind CSS, Material UI, and JavaScript, improving user interaction by 15%.
- Crafted the application using React-Redux, leveraging Redux-Saga for middleware and Redux Sauce for efficient state management, optimizing asynchronous actions and reducing load times by 20%.
- Implemented CSS Flexbox and Grids to ensure mobile-responsive user experience, increasing cross-platform accessibility by 15%.
- Collaborated with software developers, designers, and project managers to create scalable, modular, and reusable code, reducing development time by 25%.

EDUCATION

MS in Computer Science

Idaho State University, Pocatello, Idaho

PERSONAL PROJECTS

Book Store

Technologies: React, CSS, Python, Flask, JWT, Redux

- Developed an interactive online bookstore, enabling 500+ users to browse and purchase books.
- Enforced a machine learning-based recommendation system, improving book discovery by 40%.
- Designed a responsive front-end using React and CSS, expanding user engagement and reducing bounce rates by 30%.
- Built a secure backend with Flask, integrating JWT authentication and Redux for efficient state management.

DeFifa

Technologies: React, SCSS

- Built an online tool for reviewing 1000+ player statistics from FIFA22.
- Designed a dynamic and responsive UI using React and SCSS, improving user engagement by 30%.
- Implemented interactive components, enabling users to efficiently search and filter player data, reducing lookup time by 40%.

LEADERSHIP EXPERIENCE

Software Engineer I

Project Bank: Karnali

- Supervised and mentored 5+ interns, guiding core concepts and development practices.
- Ensured compliance with coding standards and best practices, conducting weekly code reviews and hands-on training, resulting in a 25% improvement in intern code quality.
- Fostered a collaborative learning environment, leading to 100% successful project completion by interns on time and with high-quality standards.

CERTIFICATES

Introduction to Front-End Development (Meta)

December 2024

- Completed a Meta Front-End Developer Professional Certificate, boosting skills in mobile and web development with a focus on modern front-end technologies and best practices.
