

SAI SRUTHI BEJAGAM

DATA ANALYST

Arizona, USA | +1(213) 205-4488 | bejagamsruthi2000@gmail.com | [LinkedIn](#)

PROFESSIONAL SUMMARY:

- Data Analyst with 4+ years of extensive experience in healthcare and financial sectors, proficient in developing and optimizing data pipelines, building predictive models and designing interactive dashboards.
- Expertise includes Apache Airflow, dbt, Snowflake, Tableau, XGBoost, Random Forest, Logistic Regression, SQL, Python, Alteryx, SSIS, Pandas, HIPAA, GDPR, HITRUST, HL7, FHIR, Epic, Cerner, Meditech, R, Azure Synapse Analytics, Databricks, Apache Kafka, Spark Streaming, Power BI, Talend, Scikit-learn, TensorFlow, A/B testing, AWS S3 and Redshift.
- Proven ability to streamline ETL processes, improve data integrity, ensure regulatory compliance and deliver actionable insights for strategic decision-making.
- Adept at conducting root cause analysis, optimizing data workflows and implementing real-time monitoring systems.

TECHNICAL SKILLS:

Data Analytics & Visualization:	Tableau, Power BI, Matplotlib, Seaborn, Advanced Analytics, Excel
Programming Languages:	Python, R, SQL
Machine Learning & Statistical Modeling:	XGBoost, Random Forest, Logistic Regression, Scikit-learn, TensorFlow
ETL & Data Pipelines:	Apache Airflow, dbt, Alteryx, SSIS, Talend, Pandas
Big Data & Cloud Computing:	Azure Synapse Analytics, Databricks, Apache Kafka, Apache Spark, AWS (S3, Redshift)
Databases & Data Warehousing:	Snowflake, MySQL, PostgreSQL, SQL Server, Oracle, Database
EHR & Healthcare Data Standards:	HL7, FHIR, Epic, Cerner, Meditech
Regulatory & Compliance:	HIPAA, GDPR, HITRUST, Basel III, IFRS 9, KYC, AML, ERP
Data Security & Governance:	Data Encryption, Masking, PHI Access Control
A/B Testing & Experimentation:	Statistical Hypothesis Testing, Campaign Optimization
Automation & Scripting:	Python Automation, Shell Scripting, Project Management
Other tools and technologies:	Apache Flink, Hadoop, MongoDB, Flink, Hive, NoSQL, CI/CD, key performance indicators (KPI), operational metrics, data visualization, business strategy, Business Intelligence, data reporting, data strategy, end-to-end, effective communication, Agile, KPI, data modelling, data structures, data warehouse, Jira, Troubleshooting, business analysis, data pipeline, end-to-end, Kubernetes, Agile, Docker, NumPy and Containerization
Soft Skills:	business analytics, data architecture, cross-functionally, communication skills, problem-solving, transformation, communication skills, detail oriented, problem-solving
Version Control & Collaboration:	Git, GitHub
Operating Systems:	Windows, Linux, Mac iOS

EDUCATION:

Master of Computer - Science Northern Arizona University, Arizona, USA

Bachelor of Information Technology - Anurag Group of Institutions, Hyderabad, India

CERTIFICATION:

Microsoft Certified: [Azure Data Engineer Associate](#)

PROFESSIONAL EXPERIENCE:

Data Analyst | CVS Health – AZ |

August 2023 – Present

- Developed and optimized healthcare data pipelines using Apache Airflow, dbt and Snowflake, reducing data processing time by 40% and improving real-time decision-making for patient care.
- Designed and deployed interactive Tableau dashboards to track patient readmission rates and length of stay, leading to a 25% increase in hospital operational efficiency and 15% reduction in preventable readmissions.
- Built predictive models using XGBoost, Random Forest and Logistic Regression to forecast claims denials and fraud detection, reducing claim rejections by 18%.
- Optimized SQL queries and indexing strategies for efficient EHR (Electronic Health Records) data extraction, reducing query execution time by 30% and accelerating clinical decision support reporting.
- Developed Python-based automation scripts for ETL processes using Alteryx, SSIS and Pandas, streamlining data ingestion workflows and cutting manual effort by 50%.
- Ensured HIPAA, GDPR and HITRUST compliance by implementing data encryption, masking and PHI access control policies, reducing security vulnerabilities by 40% and preventing compliance violations.
- Integrated HL7 & FHIR interoperability standards into healthcare data pipelines, enabling seamless data exchange across Epic, Cerner and Meditech EHR systems, improving care coordination.
- Conducted root cause analysis of adverse patient outcomes using Python, R and SQL, providing actionable insights that enhanced oncology and cardiology treatment protocols, leading to a 20% improvement in patient recovery rates.
- Worked on the migration of on-premise healthcare data warehouses to Azure Synapse Analytics, reducing infrastructure costs by 30% while improving query performance by 45%.
- Implemented real-time patient monitoring and anomaly detection systems using Databricks, Apache Kafka and Spark Streaming, enabling instant alerts for abnormal vitals and reducing critical response time by 35%.

Data Analyst | Accenture – India |

February 2020 - July 2022

- Spearheaded the creation of an advanced credit risk assessment model utilizing machine learning algorithms, resulting in a 30% increase in predictive accuracy and a 15% reduction in default rates across the portfolio.
- Revamped and optimized interactive data visualization dashboards in Power BI, which led to a 50% increase in stakeholder engagement & comprehension during quarterly reporting sessions, facilitating data-driven decision-making
 - Executed comprehensive data cleaning and pre-processing workflows using Python and SQL, ensuring high levels of data integrity and accuracy for analytical processes, which directly supported strategic initiatives.
- Architected and deployed robust ETL processes using Talend, effectively integrating data from diverse financial systems and enhancing the efficiency of data retrieval and reporting.
- Developed and fine-tuned predictive models for credit scoring and fraud detection using Scikit-learn and TensorFlow, significantly improving risk management strategies and operational efficiency.
- Conducted rigorous A/B testing on marketing campaigns, leading to the optimization of customer segmentation strategies and a measurable increase in campaign effectiveness.
- Ensured all analytical processes adhered to stringent regulatory standards, including Basel III and IFRS 9, thereby mitigating compliance risks and enhancing the organization's reputation.
- Leveraged AWS services, including S3 and Redshift, for scalable data storage and processing solutions, optimizing data workflows and reducing operational costs.
- Partnered with IT and compliance teams to implement robust data security measures, ensuring adherence to KYC and AML regulations and safeguarding sensitive financial information.
 - Delivered timely ad-hoc analyses and comprehensive reporting to support critical business initiatives, enabling informed decision-making and strategic planning across departments.
