Saint Louis, MO | +1 (314) 261 6530 | abhistephen.rokkam@slu.edu

Education

Saint Louis University, St. Louis, MO

Aug 2023 - Expected Dec 2025

Master of Computer Science (GPA: 3.94/4.0)

Technical Skills

Automation & Tools: Tricentis Tosca, qTest, GIT, Jira, Jenkins, Rally **SAP Modules:** SAP SD

Programming & Scripting: Python, Java, SQL, JavaScript **Frameworks & Web Tech:** React, Flask, HTML, CSS,

Databases: PostgreSQL

Experience

Accenture, Hyderabad, India

Dec 2020 – Aug 2023

Application Development Analyst

- Gained hands-on experience with SAP SD (Sales and Distribution) as part of an automation testing project on SAP applications.
- Analyzed and comprehended business processes, focusing on Order-to-Cash flows from sales order to billing, with foundational knowledge in SAP MM and SAP SCM.
- Familiar with managing customer, material, and customer-material info records in SAP SD.
- Customized configurations for Order-to-Cash, including sales order types, billing document types, and sales scenarios, along with Item Category, Schedule Line Category Determination, Partner Functions, Output, Text, and Pricing Determination.
- Configured key SD functions, including Material and Account Determination, Listing/Exclusion, Incompletion Logs, and Route Determination.
- Worked with Inbound and Outbound IDocs, including partner profiles and related settings.
- Test Automation with Tosca: Developed Tosca automated test cases, designed test case execution processes, and generated reports for stakeholders, including defect logging and analysis in qTest.
- Created Reusable Test Step Blocks (RTBs) and linked test cases with Excel for data-driven testing through read and write operations.
- Implemented advanced Tosca concepts, such as Libraries, Templates, and Random Functions.

Projects

Material Donor Mutual Assist, Saint Louis University

Jan 2024 – Apr 2024

- Developed a donor tracking web platform using React.js, Node.js (Express.js), and AWS, boosting donor engagement by 40
- Created APIs and integrated backend services, resolving integration issues and enhancing testability.
- Documented testing and deployment procedures for maintainability and CI/CD readiness
- *Technologies: Reactjs, Node.js with Express.js, Tailwindcss, PostgreSQL, AWS*

Personal Budget Management System

May 2024 – Jul 2024

- Built a budgeting and savings tracking platform using Python (Flask) and Snowflake for secure, scalable data management.
- Designed responsive UIs with HTML, CSS, JS, improving mobile usability by 90% .
- Enabled users to set financial goals, track income/expenses, and view personalized financial insights.
- Generated detailed reports and visualizations based on user activity to support better financial decision-making.
- *Technologies: Python (Flask), Snowflake, HTML, CSS, JavaScript*

Task Management Application

Aug 2023 – Dec 2023

- Built a task manager using React with an intuitive interface for task organization and tracking.
- *Technologies: React, JavaScript*

Certifications

- Tricentis Tosca AS1, AS2, TDS1
- Core designer Certificate, Dataiku
- Automation Practitioner – Foundation Level
