PROFESSIONAL EXPERIENCE

FROPES TECHNOLOGIES

August 2009 till May 2010

Project Details:

Project Name: Talent Review System

Client: Bongaigaon Refinery and Petrochemicals, Assam

Project Description: This project involves the manual testing of Talent Review. The Talent Review Product was designed and developed as a succession planning and talent management tool. This is a web-based system intended to be used by authorized Managers and HR personnel to track and review the talent competency of associates (employees) like technical knowledge, initiative, communication, interpersonal skill, performance etc in different format - analytical and grid format. In addition associates are also allowed to enter required information in the portal system. The information gathered are managed & analyzed by the tool, which is used for succession planning.

Role in project:

- Review of User Interface and Functional Specification Documents and Preparation of Test Cases.
- Manual execution of Test Cases
- Defect Tracking and Verification using QTP
- Daily status update to client through daily status call and reports.

Project Name: Cargo Tracking and Accounting System (CTAS)

Client: Ascent Packers and Movers

Project Description:

The Application system has been developed to receive the booking through the network of its offices and also through its website. It creates the optimized movement plan for the cargo, taking into account the cost of movement and transit time,

shipment type etc. System also provides facilities for reporting various milestones regarding progress of Cargo Movement. It also generates billing information based on rate agreement with the registered customers. Apart from above, the application also maintains various costing information and stock of logistics at the various facilities of the company. It also provides facilities for generating various reports.

Role in project:

- Review of User Interface and Functional Specification Documents and Preparation of Test Cases.
- Execution of Test Cases and logging defects.
- Defect Tracking and Verification.
- Status reporting.
