Computer Science graduate student with 3+ years of experience as a ServiceNow Developer specializing in ITSM, integrations, and workflow automation. Skilled in Java, Python, cloud platforms, and data analytics with hands-on project experience in machine learning and market analysis.

EDUCATION

DePaul University
Master's in Computer Science

Sep. 2023 – June 2025
Chicago, IL

Velammal Engineering College
Bachelor of Technology in Information Technology

June. 2016 – April 2020
Chennai, India

EXPERIENCE

Senior Service-now Developer (Autodesk, Fortive)
Cognizant Technology Solutions (Associate)

June 2020 – Aug 2023
Chennai, India

- Senior ServiceNow Developer with 3+ years of ITSM experience, specializing in CMDB and Event Management for clients like Autodesk and Fortive
- Developed REST APIs and created 30+ custom workflows and catalog items to automate incident, request, and change processes in ServiceNow
- Integrated third-party tools such as SAP, QlikView, and Azure, improving platform interoperability and automating cross-system data flows
- Resolved over 600 incidents and service requests by collaborating with clients to understand requirements and deliver tailored solutions
- Managed development tasks using Jira and contributed to agile delivery cycles through hands-on design, debugging, testing, and deployment of 60+ client-facing features

PROJECTS

Shopping System | *Java, Eclipse*

- Developed secure user authentication and product catalog management to enhance data protection and streamline the shopping process.
- Outcome: Reduced user login issues and product browsing delays, improving overall system usability.

Market Analysis of Google Play Store Apps | *Excel, Tableau, R*

- Analyzed app store data to uncover trends and deliver actionable insights for developers and marketers using advanced visualizations.
- Outcome: Identified top-performing app categories, helping guide feature focus and marketing strategies.

Real Estate Price Trend Analysis | *Excel, R*

- Performed time-series and regression analysis to identify key factors influencing property prices in Connecticut, improving forecast accuracy.
- Outcome: Improved price prediction accuracy and helped isolate location-based impact on pricing.

Lung Cancer Risk Prediction Using ML | *Python, Jupyter Notebook, Excel*

- Built and evaluated Naive Bayes, Random Forest, and KNN classifiers on a 220K+ record dataset.
- Outcome: Improved minority class (high-risk patients) detection by over 25% through oversampling and feature selection techniques.

TECHNICAL SKILLS

Programming Languages: C/C++, Java, Python, R, and SQL

Web Development: HTML/CSS, JavaScript

Tools & Platforms: Git, Docker, GCP, AWS, VS Code, Eclipse, JIRA

Data & Analytics: Pandas, NumPy, Matplotlib, Excel, Tableau, Power BI, RStudio, Regression, Analysis

ML & Big Data: Machine Learning, AI, Hadoop, Spark, Algorithms

ServiceNow: ITSM, CMDB, Service Catalog, REST APIs, JSON, XML, Flow Design, Integration
