Professional Summary

Software Engineer with 4+ years of experience in building scalable web and mobile applications, specializing in backend and frontend technologies (React, Angular, Chart.js), cloud platforms, CI/CD pipelines, and API development, with expertise in optimizing system performance and delivering high-performance solutions across Linux and Windows environments while working in Agile development environments.

Experience

Pacific Source Health Plans

October 2024 – December 2024

Software Developer (Tech Stack: C#, .NET Core, Tidal, EF Core, SQL Server, T-SQL, SSIS)

SpringField, Oregon

- Migrated 150+ stored procedures from the Facets (SQL) database to C# using Entity Framework Core, refactoring complex T-SQL logic for optimized query execution.
- Developed SSIS packages to automate the loading of 500,000+ electronic medical/health records into multiple tables across DEV, PROD, and QA environments, reducing manual effort by 60%, and configured scheduled SSIS jobs to streamline dataset loading into designated network drives, improving data availability by 45%.

Oregon Department of Forestry

November 2023 – August 2024

Application Developer (Tech Stack: ASP.NET MVC, Azure DevOps, Docker, GIT, HTML, CSS, JavaScript, Blazor, MySQL SSRS, XUnit) Salem, Oregon

- Designed and developed multiple web-based and mobile applications using Blazor, including interactive dashboard applications for monitoring forest fires, tracking smoke diffusion, managing seed inventory, and overseeing departmental finances.
- Constructed 20+ RESTful APIs for web and mobile apps using the ASP.NET MVC framework, developed test suites with XUnit to enhance code efficiency and reduce bugs by 40%, and designed interactive SSRS reports for real-time data insights and improved decision-making.

Portland State University

August 2023 – October 2023

Application Engineer (Tech Stack: Python, Flask, Apache Kafka, GCP, Docker, MapBoxGL, MySQL, HTML, CSS)

Portland, Oregon

- Implemented 15+ APIs using Flask and Python to streamline querying of targeted subsets within transit datasets, improving data retrieval speed by 35% and enhancing system efficiency for large-scale analysis.
- Demonstrated an event-streaming distributed system to ingest real-time data, improving system load efficiency by 38% and network bandwidth usage by 25%, while ensuring 100% API accessibility for all students.

Lam Research

June 2022 – March 2023

Software Engineer Intern (Tech Stack: ASP.NET, EF Core, HTML, CSS, JavaScript, TypeScript, React, SSIS, SQL Server)

Tualatin, Oregon

- Completed multiple dashboard applications using React and designed backend web architecture with .NET technologies such as ASP.NET and EF Core to analyze and visualize wafer data logs, improving data analysis speed by 38% and enhanced visualization features to drive better decision-making efficiency.
- Set up an SSIS ETL pipeline to load and store data from various sources, optimizing processes and increasing data extraction and loading efficiency by 50%.

Accenture Solutions Private Limited

August 2019 – August 2021

Application Development Associate (Tech Stack: C#, ASP.NET MVC, Apollo GraphQL, HTML, CSS, JavaScript, React, MongoDB)

Bengaluru, India

- Revamped Unilever's E-Commerce Web Applications by redesigning over 10 APIs and data models using the ASP.NET MVC framework, leading to a 40% increase in data retrieval speed and a 30% enhancement in overall system performance.
- Transitioned from RESTful to GraphQL architecture, reducing average API response times by 35% through enhanced data querying and decreasing server load by over 60% during peak hours, resulting in improved application responsiveness and performance.

Tools

IDE: Eclipse, IntelliJ, Visual Studio, Visual Studio Code

Programming Languages: Java, Python, C#, TypeScript

Database Management: MySQL, SQLite, Microsoft SQL Server, PostgreSQL, MongoDB,

Frameworks: ASP.NET MVC, .NET Core, Node JS, Blazor, SSRS, SSIS, Spring Boot, Hibernate, JPA, Flask

Web Development: HTML, CSS, Javascript, PHP, Bootstrap, React/Native, Redux, React, AJAX, JQuery

Deployment and Visualization Tools: Docker, AWS, GCP, Azure DevOps, Power BI, Tableau, D3 JS, Blazor

Applications: Postman, FileZilla, Microsoft Office Suite

Education

Portland State University

September 2021 – June 2023

Master of Science in Computer Science

Portland, Oregon

Visvesvaraya Technological University

August 2016 – August 2020

Bachelor of Engineering in Information Science

Bengaluru, India
