## SUMMARY

As a Certified Power BI Data Analyst, I provide unique and impactful business insights and solutions by creating interactive reports and dashboards. By utilizing various data cleaning, modeling and analysis techniques, I also have showcased Pyramid data analytics software for advanced data-driven presentations to various clients. Currently, I am exploring Power Automate and Agentic AI in creating automated workflows and tasks. As a team player, I communicate effectively and work passionately with clients to achieve their goals.

## EDUCATION

**UNIVERSITY OF TEXAS AT AUSTIN (ONLINE)**, Austin, TX Expected 01/26  
Data Analytics Essentials Program

**UNIVERSITY OF CENTRAL FLORIDA**, Orlando, FL 05/20  
B.S in Health Science

## SKILLS

- ◆ BI Tools: Microsoft Power BI, Pyramid Analytics, Tableau
- ◆ Data Technologies: Microsoft Fabric (In-Progress), Power Automate (In-Progress)
- ◆ Data Analysis: DAX, data modeling, KPI tracking, visualization design
- ◆ Programming: Python (entry-level training), PQL, SQL
- ◆ Other: Data cleansing, ETL processes, report optimization

## PROFESSIONAL TRAINING

**Pyramid Analytics, KASH Tech** 06/24

- ◆ Data Analyst, Data Modeler, Business Modeler, Administrator

**Power BI Data Analyst Associate Certification** 08/23

- ◆ Microsoft Certification ID: 995428385

**Microsoft Power BI Bootcamp, Udemy.com** 03/23

- ◆ Preparing, cleaning and transforming data
- ◆ Creating visualizations
- ◆ Using basic DAX functions
- ◆ Publishing report on Power BI service

**Python Programming, Systech** 06/25

- ◆ Onsite entry level training

## PROFESSIONAL EXPERIENCE

**KASH TECH, LAKE MARY, FL** 05/24 - Present

*Data Analyst*

**Pyramid Analytics Drone Accelerator**

11/24 - Present

Created a drone manufacturing accelerator utilizing Pyramid's data analytics software while marketing KASH Tech's services:

- Data Preparation & Modeling: Utilized Excel to create drone manufacturing data for downstream analysis and implemented robust data flows within Pyramid Modeler
- Report Visualization: Developed visualizations such as stacked column and global map charts to show key manufacturing metrics in quality assurance, sales performance, and inventory levels
- Enhancements: Incorporated KPI metrics such as component failure rate and AI Chatbot-rendered visuals through unique LLM prompts
- Presentation: Compiled a comprehensive manufacturing presentation incorporating the various visuals to communicate data-driven insights to pyramid analytics

**Client: Swisher, Jacksonville, FL**

05/24 - 4/25

- Migrated, tested, and published reports and dashboards to Microsoft Fabric utilizing Power BI and Azure DevOps tools
- Actively involved in enhancing sales and inventory tracking, data visualization, and workflow efficiency for Swisher, a leading product company

**Personal Trainer, YMCA, Oviedo, Florida**

06/22 - 10/24

- Promoted health education, coordinated with staff to serve 20+ individual clients and led group fitness classes of 16+ members while developing strategic fitness goals and ensuring proper exercise technique

**PROJECTS**

**Power BI Case Study**

01/24 - 03/24

*“Effect of Covid-19 on Food Consumption Across Demographics”*

- Imported marketing data from website into Power BI and hypothesized a problem
- Prepared, cleaned, and transformed data through the Power Query Editor
- Used clean data to create visualizations such as tooltips and filters to understand trends in data values
- Published and created a report on the Power BI dashboard website
- Created a power point presentation highlighting my analysis process and the outcome of specific features in analyzing Covid data
- Country Wise Insight:
- Stacked Column Chart: In Country 1, about 82% of protein was consumed by their undernourished population while only 0.02% protein was consumed by their confirmed covid population

09/23 - 10/23

**Construction of Customer Excel Dashboard**

- Retrieved customer background data through a drop-down menu using vlookup function
- Executed Index and Match functions as efficient alternatives to vlookup
- Created count, average, and last order measures using Subtotal function
- Recorded advanced filtering using Macro and used visual basic editor to run code
- Implemented customer-trigger order record filtering using VBA
- Generated dynamic charts incorporating slicers to create a dashboard
