

SHIV ABHINAY MADARAPU

Irving, TX, USA | +1 (940) 594-2464 | shivmadarapu8@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

- A Full Stack Developer with around 5 years of experience in designing, developing, and deploying scalable applications in healthcare and e-commerce sectors. Proficient in Java, Spring Boot, React.js, Node.js, and cloud services (AWS, GCP).
- Skilled in implementing microservices and RESTful APIs, enhancing system performance and operational stability. Demonstrated success in establishing CI/CD pipelines, optimizing UI/UX, and mentoring junior developers in Agile environments.
- Proven track record of improving application efficiency and customer engagement while ensuring compliance with industry standards. Strong collaborator with a focus on delivering high-impact solutions.

TECHNICAL SKILLS

Front-End Technologies:	HTML5, CSS3, JavaScript (ES6+), TypeScript, React.js, Redux, React Hooks, React Native, Angular, Vue.js, jQuery, Bootstrap, SASS/SCSS, Webpack, Babel, Prime Faces
Back-End Technologies:	JavaScript, Java, Python, C, C++, Node.js, Express.js, NestJS, Koa.js, Hapi.js, GraphQL, RESTful APIs, Socket.io, JWT, REST API, Microservices, Hibernate ORM, Flutter
Package Managers:	NPM, Yarn, Gulp, Grunt
Methodology:	Waterfall, Agile Scrum, Agile Kanban, TDD
IDEs	Visual Studio Code, IntelliJ IDEA, Eclipse, Maven, Gradle, NetBeans
Web Services	RESTful, SOAP
Databases	MySQL, PostgreSQL, SQLite, MongoDB, CouchDB, Firebase, Sequelize, Mongoose
CI/CD & Tools	Jenkins, Code Ship
Testing tools	Mockito, Unit, React Testing Library, Jest, Chai, Enzyme, Cypress, Selenium/WebDriver
Cloud & Deployment	AWS, Azure, Google Cloud Platform, Docker
Web Server	Apache Tomcat, WebLogic
Other Skills	Bash, Shell Scripting, Lazy Loading, Code Splitting, Caching, CDN, OWASP, HTTPS, Data Encryption, CSRF/XSS Protection, ESLint/Prettier, Postman, Figma/Adobe XD
Operating Systems	Windows, LINUX, macOS

WORK EXPERIENCE

Full Stack Developer | Humana, KY, USA

October 2023 - Present

- Worked on the design, development, and deployment of a microservices-based healthcare application using Java, Spring Boot, and React.js, improving system performance by 25% and enhancing the platform's operational stability.
- Developed and deployed secure, high-quality production code in an AWS cloud environment, utilizing services like Lambda, S3, and PostgreSQL to build scalable healthcare solutions, ensuring seamless patient data flow and secure storage.
- Collaborated with cross-functional teams (including healthcare professionals) to troubleshoot and resolve critical system issues, reducing downtime by 15% and ensuring continuous availability of essential healthcare services.
- Played a key role in establishing CI/CD pipelines, incorporating best practices for application resiliency and security to meet healthcare compliance standards, accelerating release cycles by 30%.
- Applied advanced Object-Oriented Programming (OOP) and Service-Oriented Architecture (SOA) principles, using industry-standard design patterns to develop modular, reusable code components that improved maintainability and ease of future updates in healthcare applications.
- Automated recurring technical issues using Kafka for message streaming and Cassandra for data storage, ensuring high reliability and reducing manual intervention in critical healthcare data processing tasks.
- Led technical evaluation sessions with external vendors to assess and integrate cutting-edge healthcare technologies (e.g., EHR, HL7 interfaces), enhancing the system's capabilities and ensuring compliance with healthcare regulations and industry standards.
- Mentored junior developers, fostering a culture of diversity and inclusion within the team, and promoting the adoption of modern technologies and Agile methodologies in delivering high-impact healthcare solutions.

Software Engineer | Mphasis, TX, USA

May 2022 - July 2023

- Managed and developed a real-time order management system using Node.js, Express.js, and MongoDB, ensuring seamless inventory updates and optimized order tracking.

- Designed and implemented RESTful APIs for service-oriented architecture, enabling smooth communication between microservices and enhancing platform flexibility.
- Utilized Promises and async/await to manage asynchronous workflows, preventing callback hell and improving code readability and efficiency.
- Implemented Socket.IO for real-time notifications and status updates, enabling users to track orders and receive alerts without page reloads.
- Deployed cloud infrastructure on AWS (EC2, Lambda, API Gateway) to support scalable systems, reducing server costs by 15% while enhancing platform reliability.
- Integrated SQL Server for reporting and MongoDB as the primary NoSQL database for fast, scalable data access.
- Developed cloud messaging APIs using AWS SNS to send push notifications, increasing customer engagement and improving delivery alert systems.
- Performed performance tuning and code profiling, improving application response time by 20% and enhancing overall system efficiency.
- Hands-on experience with Google Cloud Platform (GCP), AWS, and Azure, adept at leveraging cloud services for scalable and resilient solutions.
- Optimized the platform's UI/UX for desktop and mobile users, using adaptive designs and cross-platform techniques to ensure a consistent experience across devices.
- Applied scalable design best practices, ensuring the system could handle peak traffic without service disruptions or downtime.
- Implemented AWS SQS queues to manage asynchronous tasks, ensuring reliability in order processing and background job management.
- Collaborated in an Agile environment, using Git for version control and Jenkins for CI/CD pipelines, streamlining deployments and enabling rapid, iterative development.

Software Engineer | Intex Technologies, Bangalore, India

May 2019 – July 2021

- Led front-end development for an e-commerce platform, enhancing the online shopping experience and contributing to a 25% increase in customer retention and a 15% boost in sales within the first quarter.
- Developed and managed complex user interfaces using React.js and Redux, ensuring efficient state management and seamless user interactions.
- Structured and styled web pages with HTML5, CSS3, and JavaScript (ES6+), resulting in a responsive, visually appealing platform that significantly improved user satisfaction.
- Integrated APIs using Axios for efficient data fetching and posting, ensuring smooth communication between front-end and back-end systems.
- Optimized platform performance using Webpack and Babel for module bundling and JavaScript transpiling, ensuring compatibility across browsers.
- Conducted unit testing with Jest and Enzyme, achieving zero critical bugs at launch and ensuring high code quality and reliability.
- Designed responsive UI components using Bootstrap and Material-UI, delivering a consistent and polished user experience across devices.
- Collaborated effectively with team members using Git and GitHub for version control and JIRA for project management, ensuring smooth workflows and timely deliveries.

EDUCATION

Master of Science in Computer Sciences | University of North Texas, Denton, USA

December 2022

Bachelor of Engineering in Computer Science | Kakatiya Institute of Technology and Science, Telangana, IN

May 2021
