SUMMARY

Data/Business Analyst with 4+ years of analytics experience across high-impact roles at Amazon and Morningstar. Expertise in using SQL, Tableau and advanced data visualization to streamline marketing data and drive strategic decision-making. Demonstrated success in automating business processes and collaborating cross functionally across teams to deliver actionable insights that optimize Ads performance.

TECHNICAL SKILLS

- Programming:** Python, SQL, HTML, Java, PowerShell
- Database:** MySQL, MS SQL Server, MongoDB, Oracle DB, Snowflake
- Data Science | Machine Learning:** NumPy, Pandas, Matplotlib, Scikit-learn, Linear/Logistics Regression, Random Forest
- Analytics | Frameworks:** Tableau, Power BI, Quicksight, Google Analytics, Git, GraphQL
- Tools | Platforms:** IntelliJ, VSCode, JIRA, MS Excel
- Cloud:** AWS S3, EC2, Cloudwatch, Athena, CloudFormation, Route 53, IAM, Kinesis, DynamoDB, RedShift, Lambda, Glue

PROFESSIONAL EXPERIENCE

Amazon, Seattle, WA (Amazon Freevee [Formerly IMDb TV]))

Business Analyst

Apr 2024-Present

- Developed executive Tableau and Amazon QuickSight dashboards for business stakeholders to monitor Marketing Ads KPIs on Amazon Freevee FireTV App enabling data-driven and strategic recommendations driving increased ~800 watch hours.
- Optimized ETL jobs using SQL to analyze AWS Redshift data that delivered actionable insights streamlining Ads planning, improving operational efficiency by 30%.
- Collaborated with cross-functional teams to design KPI reports and self-service dashboards contributing to informed strategic decision-making for A/B testing on Amazon Ads marketing campaigns leading to savings of \$65K in holiday and peak season.
- Leveraged Python and SQL to automate event tracking and analyze performance trends, contributing to a 50% reduction in turnaround time.
- Designed and optimized Power BI dashboards to track Ads performance, customer activity, and customer engagement metrics, improving data accessibility and decision-making.
- Led cross-functional requirement gathering sessions with sales, marketing, and operations teams to define KPIs and reporting needs, ensuring alignment with strategic business goals.
- Automated redundant weekly analytics task using AWS SNS, Lambda and Slack thereby reducing overall churn and saving ~18 hours effort monthly.

Amazon, Seattle, WA (Amazon Freevee [Formerly IMDb TV])

Oct 2022-Mar 2024

Software Development Engineer

- Delivered Freevee live TV channel search feature, through comprehensive resolution encompassing API contract review, client-side code integration, and rigorous testing, resulting in a 3.4% boost in discoverability, equating to \$120 increased revenue per hour per channel.
- Enhanced deployment efficiency by implementing SDLC best practices, CI/CD pipeline with CloudCover, and API integration tests. Reduced manual deployment issues and improved test coverage by 10%.
- Spearheaded the design and implementation of API modifications based on devised lower-level design for resolver-level API modifications, facilitating seamless tracking of season and episode numbers for linear channels leading to boosted visibility, allowing users to monitor pending episodes within a season.
- Actively participated in team on-call responsibilities, prioritizing urgent customer-facing issues. Root caused operational inefficiencies and refactored latency alarms, placing a strong emphasis on ensuring long-term operational stability.

CloudSpace LLC, Atlanta, GA

Aug 2022-Oct 2022

Data Analyst Intern

- Architected streamlined data extraction, processing, and storage solutions for manufacturing sector clients, resulting in a 20% reduction in data retrieval time and a 25% increase in overall operational efficiency.
- Engineered and owned business dashboards to be consumed by varied stakeholders giving holistic view of sub-divisions of the businesses. Revenue metrics analysis based on subcategories of products sold using time series.

Morningstar, Mumbai, India

Sept 2018-Jul 2021

Data Analyst

- Executed data mining and wrangling using Pandas and NumPy to visualize key financial market KPIs, enabling data-driven insights and trend analysis.
- Built SQL scripts to automate redundant & time-consuming data validation reports, using SQL Server Management Studio, saving ~50 hours of team's weekly manual effort.
- Automated manual JIRA processes by training classification ML model with F1 score of 92%. Thus enhanced business processes by increasing productivity.
- Used predictive, perspective, and descriptive analytics based on key performance indicators to build reports for higher management.
- Built interactive Tableau Dashboards to track KPIs of financial data across markets that helped business teams to take informed decisions.

ACADEMIC PROJECTS

Retail Sales & Market Trend Analysis (SQL, Python, Tableau)

- Extracted, cleaned, and processed retail sales data using SQL and Python to identify key customer segments and sales patterns. Applied K-Means clustering for customer segmentation and time-series forecasting for sales trends with R2 at 0.7.
- Constructed interactive Tableau dashboards to visualize sales performance, customer purchasing behavior, and competitor pricing trends. Identified 20% of customers contributed to 60% of revenue and uncovered seasonal trends, leading to 5% increase in profit margins through optimized pricing and marketing strategies.

Yelp Customer Reviews Sentiment Analysis (SQL, AWS, Python (TextBlob), Tableau)

- Extracted, cleaned, and processed Yelp Reviews dataset with 7 million records using Python. Split master dataset into multiple subsets for concurrent processing on AWS S3. Applied TextBlob to plot the sentiment for restaurant reviews using word cloud.
- Constructed interactive Tableau dashboards to visualize restaurants ratings across multiple months. Identified 20% of customers contributed to 30% of reviews and uncovered analytical insights like users with most reviews, positive review sentiment restaurants, top reviewed businesses using SQL.

EDUCATION

Georgia State University, Atlanta	Dec 2022
Master of Science in Information Systems	
Coursework: <i>Big Data Analytics, Data Programming, Machine Learning, Big Data Infrastructure</i>	
University of Mumbai, India	May 2016
Bachelor's in Commerce
