SUMMARY: 3-year-experience data analyst looking for full-time position. Proficient in Rstudio/SQL/Looker Studio/Tableau to support business decisions through visualization and data manipulation. AI related experience. Willing to relocate to anywhere.

Work experience

- **Data Analyst**, Kemon Warehouse, Richmond VA (Hybrid), 10/2023-now:
 - ❖ Developed and maintained dashboards in Looker Studio to track and visualize data trends.
 - ❖ Collaborate in the development and refinement of Key Performance Indicator (KPI) standards, leading to a measurable decrease in turnover rate.
 - ❖ Create time series data, then conduct performance analysis of employees in Looker Studio.
 - ❖ Identify outliers/abnormal data within the shipping and receiving department on a weekly basis and investigate the underlying reasons.
 - ❖ Streamline operations by transitioning manual paperwork processes to a digital platform (Google Sheets), resulting in saving significant time and cost savings.
 - ❖ Interface with diverse agencies and sales vendors to procure necessary supplies, review PMs, utilizing analytical techniques to optimize purchasing decisions.
- **Data Analyst**, Kroger Sushi (L&G Foods LLC), Richmond VA, 06/2022-08/2023:
 - ❖ Gather and systematically arrange daily observational data to facilitate a comprehensive understanding of operational trends.
 - ❖ Employ ANOVA tables to examine the relationship between sales volume and product types, providing valuable insights for strategic decision-making.
 - ❖ Utilize forecasting methods to anticipate future sales, aiding in proactive planning and optimization of product quantities and categories for upcoming weeks.
 - ❖ Leverage RStudio and Excel to visualize data effectively, creating insightful charts and graphs to depict patterns and trends effectively.
- **Research Assistant**, VCU, Richmond VA, 02/2022-01/2023:
 - ❖ Examine the impact of COVID-19 on the academic performance of college students.
 - ❖ Study the effects of electronics and classroom milieu on learning outcomes in large biology courses.
 - ❖ Record data into MySQL and clean up the data in Rstudio using tidyverse.

Extracurricular activities & Affiliations

- Develop Discord **AI bots** (2023): Use Node.js to create discord bots that are being used in 5 servers.
