EDUCATION

Governors State University

M.S., Computer Science

Dec, 2024

University Park, IL

- Cumulative GPA: 3.73/4.00
- Relevant Coursework: Internet Programming, Advanced Database Concepts, Planning Mgmt Software Proj, Advanced OS, Big Data Analysis, Scripting Languages.

Gujarat University

B.A., Computer Application

May, 2022

Abmedabad, GJ

- Cumulative GPA: 7.05/10.00
- Relevant Coursework: Data Structures & Algorithms, Web Development, Operating Systems, Software Engineering, Computer Networks, Database Management Systems, Human-Computer Interaction, Object-Oriented Programming, Information Security, Mobile Application Development.

WORK EXPERIENCE

Wizdom IT

Python Developer

Feb 2025 – Present

Bronx, NY | Remote

- Leveraged Django's MVT (Model-View-Template) structure to build applications, adhering to Object-Oriented Programming principles for enhanced code reusability and maintainability.
- Managed Django application on AWS, utilizing EC2 for hosting, S3 for storing static and media files, ensuring efficient performance.
- Built RESTful APIs to enable seamless data exchange between systems, and optimized code performance through debugging.
- Integrated third-party libraries and APIs to extend application functionality and improve user experience.

Appgenix Infotech

Software Developer

April 2021 – May 2022

Surat, GJ

- Developed and maintained web applications using Python and Flask, enhance performance, reliability, and user engagement.
- Managed MySQL databases to store and retrieve application data efficiently, ensuring data integrity and optimal performance through proper indexing and query optimization.
- Implemented user interfaces for web applications using HTML, CSS and JavaScript.
- Utilized Jinja2 templating to render server-side data, effectively bridging the connection between the back end and front-end systems.
- Collaborated with the team on feature development and code reviews, improving application quality.

PROJECTS, CERTIFICATE & SKILLS

Projects:

- **AI-Powered Data Query & Analysis Tool:** Developed a natural language interface using Google Cloud BigQuery and Gemini API to convert user queries into SQL, enabling efficient data retrieval from the Hacker News dataset. Implemented AI-powered post analysis by fetching content via post ID, providing in-depth insights and enhancing user decision-making capabilities.
 - **Personal Blogging System:** Designed and deployed a blogging platform in Django, allowing users to register, create profiles, and post content. Implemented secure user authentication and password reset functionality via email, ensuring a smooth and secure login process. Enhanced user interface with Bootstrap, resulting in an intuitive and accessible design that increased engagement.
 - **YouTube Clone:** Built a YouTube-like platform using Django, allowing users to post, view, like, share, download, and comment on videos. Designed a custom admin panel with Django-Jazzmin for data export and report generation, streamlining admin tasks and enhancing efficiency. Structured the project across four Django applications with a Models-Views-Templates (MVT) pattern and Function-Based Views.
 - **Social Media Platform:** Developed a Twitter clone with user authentication, enabling users to create accounts, post/edit tweets, like, share tweets, follow/unfollow users, and search tweets and profiles. Built using Django for backend operations and Bootstrap 4 for front-end design, ensuring a responsive and modern use interface.
- **Certificate:** AWS Cloud Practitioner
 - **Skills:** Programming in Python, C, HTML5, CSS, JavaScript; skilled in SQLite3, MySQL, SQL Server, SQLAlchemy, PostgreSQL; proficient with Django, Flask, and libraries like NumPy, SciPy, TensorFlow, YOLO;; experienced with Nginx, AWS, Docker, Git, GitHub, Postman, Visual Studio Code, Jupyter Notebook, Google Colab; knowledgeable in REST APIs, JSON, HTTP, XML, and authentication.
