EXPERIENCE

Software Development Engineer | **Amazon** | **July 2022 – April 2024**

View-to-Purchase Hero Widget on Amazon.com Product Detail Page

- Developed a production recommendation widget displaying items purchased by viewers of the current item, integrating data analytics to showcase the lowest priced, highest rated, and most purchased items (heroes) across 21 marketplaces in three regions (NA, EU, FE) for desktop/mobile
- Technologies: Python, JavaScript/TypeScript, Kata (Amazon internal frontend language), AWS S3, EFS, Cloudwatch, KMS, IAM, DRS (Amazon internal distributed database service)
- Impact: Achieved a **3.74MM annual increase in paid units** and a significant gross sales revenue boost.

Complementary Widget on Amazon.com Product Detail Page

- Created new slots/placements for "Customers Who Bought This Also Bought" widget on detail pages to surface more organic recommendations with minimal impact to ads revenue
- Technologies: Perl, Java, Themis (Amazon internal page layout configuration tool)
- Impact: Additional **\$90MM annual overall sales revenue** accounting for cost of impact to ads revenue

Kits Dataset Initiative

- Led the development of a bundle recommendation system based on customer goals (e.g. hosting a party), leveraging product correlation/catalog data and labeling
- Technologies: **Falcon-40b-Instruct** and **Claude LLM models** to generate backfill category labels
- Impact: Generated a **\$127MM annual increase in revenue**

OpEx Oncall (on a rotation basis)

- Managed IAM based access control to encrypted S3 datasets for internal users leveraging KMS
- Maintained **100+ scheduled region-separated dataset jobs** and team's production fleets
- Tracked dashboards for build hosts' health, server-side ranking/customer-engagement on team-owned detail page features
- Handled **50+ design and placement approvals** for other teams' detail page experimentation

EDUCATION

B.S. Computer Science, GPA: 3.97, *Summa Cum Laude* (**Top 2%**)

University of California Riverside (**Sept 2019 – June 2021**)

SKILLS

- **Languages:** Python, Java, Perl, Javascript/Typescript, C/C++, SQL, CSS
- **Tools/Environments:** Git; Linux; AWS S3, EFS, EC2, Cloudwatch, KMS, IAM, DynamoDB
- **Development:** Experiment Driven Development, Agile/Scrum
- **Relevant Coursework:** Data Structures, Algorithms, SDLC, Machine Learning, Information Retrieval, Databases, Computer Security, Operating Systems, UNIX System Administration, Embedded Systems, Virtual Reality

SOFT SKILLS

Ownership of end-to-end initiatives, problem solving, analytical thinking
