Summary

Result-driven Software Engineer with 1+ year of experience at IBM and a strong academic background in computer science. Proficient in full-stack web development, AWS, and high-impact solutions. Skilled in Java, Python, and many more frameworks.

Education

Master of Computer Science, University of Central Missouri Jan 2023 - Dec 2024

Bachelor of Technology in Computer Science, Sri Padmavathi Mahila University Jul 2017 - Jul 2021

Skills

Programming Languages	C, C++, Java, Python, JavaScript
Web Technologies and Frameworks	HTML, CSS, Bootstrap, React, JSON, Node.js, jQuery, PHP, RESTful APIs
Database Management	SQL, MongoDB, MySQL, JDBC
CI/CD and other tools	GitHub, Jira, Jenkins, Docker, Postman, Terraform, Kubernetes
AWS Cloud Services	IAM, EC2, S3 Bucket, Lambda

Work Experience

Software Engineer Mar 2025 - Present
Community Dreams Foundation *USA*

- Independently led **60% of the initial data collection and user research efforts**, translating raw input into actionable datasets, resulting in an **80% improvement** in documentation accuracy and cross-team traceability.
- Built **70% of the responsive UI components** using **React**, implementing a dynamic web application with modular architecture and optimized performance across devices.
- Structured and optimized data storage using **MongoDB**, enabling **40% faster content retrieval** and scalable management for internal resources.

Application Developer Oct 2021 - Nov 2022
IBM *India*

- Improved backend system performance by 30% through hands-on **Java code optimization and debugging**. Proactively learned **React** to strengthen front-end functionality and elevate the overall user experience.
- Executed a seamless **cloud migration** strategy, accelerating transitions by 40%, through meticulous **AWS EC2 instance configuration, IAM role management, and S3 storage optimization** to improve scalability and security.
- Led deployment operations, increasing success rates by 80%, by conducting comprehensive sanity checks, build executions, and promotions, ensuring stable releases using **GitHub, Jenkins, and Jira**.
- Engineered seamless API integrations, cutting manual data processing time by 50% by automating workflows with **RESTful APIs and JSON parsing**.

Projects

Snake Game Development — JavaScript, HTML, CSS

- Designed and implemented an **interactive Snake Game**, customizing board settings, snake movement, and food placement using **JavaScript DOM manipulation** and **Math.random()**.
- Optimized game responsiveness** by controlling speed and movement with **setInterval()**, ensuring smooth gameplay and user experience.

Sakhi - Mood-Based Music Recommendation System — Machine Learning, Image Recognition

- Developed an **intelligent mood-based music recommendation system**, achieving 80% accuracy by implementing a **Haar Cascade Algorithm** for face detection and leveraging a **pre-trained model** for emotion classification.
- Achieved 95% accurate **emotion recognition based on facial expressions** in six different moods: anger, fear, happiness, sadness, surprise and neutral using **advanced image recognition and data processing techniques**.

Certifications

- Databricks - Generative AI Fundamentals**, 2025.
