Email: k0poth02@cardmail.louisville.edu

OBJECTIVE

Seeking an Internship/full time position with a company, which will require me to utilize my skills, abilities and experience in the Industrial Engineering field to ensure the company's success.

EDUCATION

University of Louisville, Louisville, KY
Master of Science in Industrial Engineering

Expected December 2015
Current GPA: 3.925

Acharya Nagarjuna University, Vijayawada, India
Bachelor of Engineering in Mechanical Engineering

May 2013
GPA: 3.90

PROFESSIONAL SUMMARY

- More than one year of working in domain knowledge in technical publications preparing **structured** Cleaning Inspection Repair (CIR) manuals, Engine Manuals (EM), V2500 (IAE) International Aero Engines Manuals and Manuals for NGPF (Next Generation Part Family) in **S1000D Standards** using Arbortext Editor 5.4, Epic Editor 4.2.1 Active CGM Author, AutoCAD and AutoTrol.
- Proficient with ATA-ispec 2200 standards and AECMA Simplified Technical English (STE) Standards.
- Familiar with publishing tools such as **Arbortext/Epic Editor 4.2.1**, LANGTON in MIDAS (Manual Interaction Data Authoring System) client environment and **Epic Editor 4.2.1** in local environment.
- Familiar with both structured and unstructured document preparation using **Arbortext/Epic Editor 4.2.1** and **MS office** in client environment and local server.
- More than a year of **tutoring experience** in a variety of fields; tutored high school students in **Mathematics, Physics and Chemistry**.
- Strong Conceptual, Business, Analytical skills and team spirit.
- Comprehensive problem solving abilities, good verbal and written communication skills, proactive, quick learner, hard worker and leadership qualities.

WORK EXPERIENCE

InfoTech Enterprises Limited,
Hyderabad, AP, India.

Nov - 2012 to Jul -2014

Designation: Design Engineer

Department : Maintenance Data Engineering (Technical Publications)

Client : Pratt & Whitney, U.S.A

Engine Models: NGPF, V2500, PW4000, PW6000, GP7000, JT9D, and JT8D

PROJECT PROFILE:

Project title	: S1000D Technical Data Creation for Aero Engines
Client	: Pratt and Whitney (P&W), USA
Software	: Arbortext Editor 5.4
Team Size	: 9
Engine Program	: NGPF and V2500 Commercial Engines.

Project Description:

Analyze inputs received in the form of Engineering Authorization, Internal Engineering Notice and graphics in tiff format for their correctness and applicability to the part. Incorporate revisions and write new assembly/disassembly procedures in Cleaning/Inspection/Repair (CIR) procedures for P&W commercial engines. Compose Technical Data using ATA100, ATA spec 2200 and S1000D and AECMA Simplified English latest standards in XML format using Arbortext Editor 5.4. Incorporate illustrations in the CGM format using Auto CAD, Unigraphics and AutoTrol. Quality checking of the Engineering Authorizations before delivering to the customer.

Responsibilities:

- Compose technical data in Arbortext as per ATA100, ATA spec 2200 and S1000D, SPOP (Service Process Operating Procedure) and AECMA Simplified Technical English latest standards in SGML format and transmit combined text and graphics file for review and incorporation into the Technical Manuals through data modules and illustrations.
- Creation of Cleaning/Inspection/Repair for NGPF & V2500 series Engine Models.
- Incorporation or modification of instructions about Introduction, Description or Operation, Test or Fault Isolation, Cleaning about various components.
- Preparation of illustrations for Cleaning/Inspection/Repair manuals about various parts by using Auto-trol 14.1.
- Preparation of data modules and common source database (CSDB) along with ICN (Illustration Control Number) and deliver to customer.
- Determining mistake-proof solutions for different validation, attributes, completeness, omnimark, key generation and numbering system errors.
- Quality checks of the data modules before delivering to the customer.
- Assisting and coordinating the Technical Publications work between Customers and Infotech Enterprises Ltd.
- Converting AutoCAD models and drawings into SOLIDWORKS AND CATIA

Environment: Arbortext Editor 5.4, S1000D, MS Office, Autotrol12.2, and Autotrol 14.1

ACADEMIC PROJECTS

- **Master's Thesis:**

Title: "An Integrated Economic Equilibrium Model for Electricity Markets"

We Consider an integrated economic equilibrium model that will aid the decision making and planning of an efficient energy policy. The key components in the model includes: electricity power generators, electricity grid owners, coal producers, natural gas producers, natural gas pipeline owners, and all relevant marketers. We study a coordination policy via the employment of the market equilibrium model in which each individual component optimizes

its own subsystem while market-clearance conditions are satisfied wherever components interact with each other. Upon the development of such an integrated model, we will further evaluate several emission control policies, e.g., cap-and-trade and carbon tax policies, in pursuing the optimal energy policy towards a cleaner energy system. The developed model will be numerically tested using commercial optimization/equilibrium software.

- **Summer Internship:** Completed 3 months of Internship on Thermal Power Plant Familiarization with **National Thermal Power Corporation Limited (NTPC Korba)**. The main objective of this work is to get a thorough understanding of the mechanical aspects of a thermal power plant. Familiarized with the working of the boilers, turbines and their various auxiliaries and traced them in the 500 MW plant of NTPC Korba.
- **Under-graduate Project:** An Industrial training and Project Report on **STEAM TURBINES** at Bharat Heavy Electricals Limited [B.H.E.L], Familiarized with the whole range of requirement from Power (Captive power & utility), Drive, cogeneration, solar applications and Combined Cycle power plants encompassing comprehensively all requirements for industry/utility sectors in range of 3-150 MW.
- **Semester Projects:** Testing Mechanical Properties Of **BROOM GRASS** (Thysanolaena Maxima) – Polyester Composites. The objective of the work is incorporation of treated broom grass fibers as reinforcement in the polyester matrix to develop partially green composite material.

TRAININGS AND CERTIFICATIONS

- Got trained on S1000D Common Source Database (CSDB) and data modules by experts from CORENA and Pratt & Whitney expert writers for NGPF engine manuals.
- Got on-job training with lead Pratt & Whitney writers on various configurations of the engine at the Pratt & Whitney.

ACHIEVEMENTS

- Received “*Pat on the Back*” awards for high productivity and problem-solving skills from higher management.
- Received four “*Team of the Month*” Awards for high productivity and problem solving skills from higher management.
- Contributed for the development of “*Automated Quality Assurance Tool (AQAT)*” which created 5% cost savings to customer.

TECHNICAL SKILLS

Languages	: C and C++
Operating System	: Windows 7/VISTA/XP/ and Linux
Development Tools	: GAMS, LINGO, ARENA, MINITAB, MS Office, AutoCAD, ANSYS, Pro/ENGINEER, Solid Works 3D CAD and Catia
Other Tools	: Editor 5.4, S1000D, Autotrol 12.2, and Autotrol 14.1
