Professional Experience

2025/04 – present
Piscataway, USA

IT Intern Engineer *Eshift Inc*

- Checking and Troubleshooting the issues faced by the software from the data and making a smooth flow of processes with a proper maintenance.
- Design, develop, and maintain scalable, reliable, and efficient data pipelines to process large volumes of structured and unstructured data from various sources.
- CRM Ticketing system processes is one of the major tasks to be maintained
- Implement data validation, cleansing, and quality checks. Ensure compliance with data governance and security policies.
- Utilize cloud platforms (such as AWS, Azure, or Google Cloud) for storage, processing, and orchestration of data services.
- Integrate data from internal and external sources into centralized data systems using ETL.

2024/06 – 2025/03
Charlotte, USA

Data and Operations Analyst *ZenspaceIT LLC*

- Executed procurement strategies to evaluate vendor risk and performance.
- Managed indirect vendor registration and vendor performance evaluation processes. Ensured compliance with company policies and procedures.
- Proactively worked across marketing and product business units to build out the specific reporting infrastructure in Tableau from the ground up.
- Used stored procedures, triggers, and views to provide structured data to business units by combining data rows from data sources.
- Managed all data and implemented quick methodologies for data promotion and operation. Successfully build a page in the company's portal. Got certified as a pro controller.
- Revamped existing financial reporting system using Power BI, reducing report generation time and increased the accuracy of financial forecasts.
- Managed vendor on-boarding process for assigned business categories. Performed risk-based reviews of vendor on-boarding requests and documents. Maintained vendor master records in ERP system.
- Built relationships with internal and external stakeholders. Provided guidance to business teams on vendor registration processes. Collaborated with Procurement, audit, and business teams.
- Experience of working with Agile methodologies with diverse teams. Guided the team during our agile transformation as we moved to an iterative approach for projects and product enhancements.

- Collaborated with cross-functional teams to align vendor management strategies with business objectives, ensuring that vendor performance metrics and KPIs were tied to company-wide goals and initiatives, resulting in 40% improvement in business outcomes and 38% increase in stakeholder satisfaction.
- Led a project page through all SDLC phases using Agile methodology with support from the development team.
