Professional Experience

- ❖ **Teaching Assistant**, University of Asia Pacific (Dhaka, Bangladesh) April 2013 – April 2014
-- **Responsibilities:** Helping teachers in labs of various courses, guiding students, taking back-up classes.

Technical Skills

- ❖ **Programming Languages:** SQL, C/C++, Python, Java, C#, Assembly Language, HTML, CSS, PHP, MATLAB.
- ❖ **Databases:** MySQL, PostgreSQL, MongoDB.
- ❖ **Cloud Platforms:** AWS, Azure.
- ❖ **Other Tools & Technologies:** pgAdmin, MySQL Workbench, MongoDB Compass, GitHub, JSON, Microsoft Excel, Microsoft PowerPoint, Microsoft Word.

Undergrad Thesis

- ❖ **Privacy-Preserving Two-Party k-Means Clustering in Malicious Model** -- accepted at the 8th IEEE International Workshop on Security, Trust and Privacy for Software Applications (STPSA), held in Kyoto, Japan, during July 22-26, 2013.

Undergrad Projects

- ❖ **Digital World Map** – A voice-controlled digital world map was developed where LEDs were connected to different locations in a world map and a corresponding LED used to lit up after taking the place name as a voice input to reduce time for manual searching. This project was for a Pattern Recognition course where we integrated basic speech recognition and electronic interfacing.
- ❖ **An Information System solution for Railway management in Bangladesh** – We proposed an online ticketing solution for Bangladesh Railway. It took a passenger's personal and payment information to create a printable ticket for that passenger.
- ❖ **SUBT – An Ultimate Site for Stock Business** – A basic web development project to learn the core web technologies and database management system. HTML, CSS, and JavaScript was used for the frontend, PHP was used for server-side scripting, and for database management, we used MySQL.
- ❖ **Automatic Exam Control System** -- A basic Java-based project was developed to practice Object Oriented Programming (OOP) concepts.

Personal Projects

- ❖ **Structured PostgreSQL database project with real-time Reddit data** – Designed a PostgreSQL database with multiple tables, automated Reddit data scraping and bulk loading, wrote structured queries to retrieve specific insights from the dataset and store them in the PostgreSQL database. All these steps were automated using a Bash Script.
- ❖ **MySQL to PostgreSQL Database Migration** – A basic data migration project was developed to migrate an existing MySQL database into a PostgreSQL database.

Education

University of Asia Pacific, Bachelor of Science, Computer Science & Engineering | GPA: 3.90/4.00

February 2013
