+1 (326) 777-9676 pranaydarekard@gmail.com 120 jay str, Dayton, Ohio, 45410. <https://www.linkedin.com/in/pranay-darekar>

SUMMARY

Civil Engineer with over 2 years of practical experience in infrastructure development, structural analysis, and site supervision. Proficient in STAAD Pro, AutoCAD, Civil 3D, and Revit, with a strong academic foundation from the University of Dayton. Skilled in managing field operations, coordinating multidisciplinary teams, and delivering projects that meet safety, design, and quality standards. Known for adaptability, technical precision, and a proactive approach to solving on-site challenges. Seeking an entry-level engineering role in a dynamic firm where I can contribute to impactful projects and grow with industry leaders.

EDUCATION

University of Dayton, School of Engineering

Dayton, Ohio

Degree (Masters of Science), Major: CIVIL ENGINEERING; GPA: 3.5

Graduation May 2025

- **RELEVANT COURSES:** Advance Structural Analysis, Prestressed Concrete, Soil Dynamics & Earthquake Engineering, Retaining Structures & Slope, Highway Geometry, Masonry Structure, Bridge Engineering
- **PROJECTS:** *Effect of water pressure on Retaining structures, The behavior of natural cohesive soils under dynamic excitations, design prestress slab for garage, Road design, Masonry wall design for 3 story building, bridge design.*

Mumbai University

Mumbai, Maharashtra, India

Degree (Bachelors of Engineering), Major: CIVIL

May, 2021

EXPERIENCE

Purva Enterprises

Mumbai, Maharashtra, India

Site Engineer

August 2022– July 2023

- Supervised the construction of substations, roadways, and drainage systems, ensuring adherence to design specifications and safety standards.
- Coordinated daily work assignments for a team of 15+ laborers, improving task efficiency and reducing downtime..
- Resolved on-site issues proactively, minimizing delays and maintaining project schedules.
- Maintained accurate records of project progress and communicated updates to senior engineers and stakeholders.
- Applied technical knowledge to support infrastructure planning and execution.
- Adapted to dynamic project conditions by responding effectively to unforeseen challenges.

Mahaveer Construction

Mumbai, Maharashtra, India

Junior Engineer

July 2021– August 2022

- Assisted senior engineers in executing residential and commercial building projects, focusing on accuracy and quality control.
- Interpreted blueprints and specifications to guide construction activities.
- Reduced material waste by 10% through improved estimation and procurement planning.
- Fostered a collaborative team environment, enhancing productivity and on-site communication.

PROJECTS

- **Effect of water pressure on Retaining structures-** Applied industry standards in conducting drained and undrained analysis, including Mohr-Coulomb failure envelope.
- **design prestress slab for garage.** Design one way slab with rectangular beams, perform load Analyse using STAD pro, and presented data on sheet with the help of excel.
- **Road design-** design a road with horizontal and vertical curve with the help of civil 3D

SKILLS/CERTIFICATIONS

Non-Technical Skills -attention to detail, facilitation, team building, collaboration, organization, problem-solving skill, Informing, Listening, Dealing with Ambiguity, learning on the Fly, Intellectual Horsepower and, Written Communications, and General understanding of water and wastewater design.

Technical Skills- Proficient in engineering design principles and relevant design standards, with a strong understanding of industry trends and technology. Experienced in ensuring adherence to quality programs and applying constructability practices to drive efficient project execution.

Computer skills

Staad pro, AutoCAD, MS OFFICE, C, BIM, Civil 3D, Revit, Tekla.

Language: Fluent in English, Marathi & Hindi.
