

# Revanth Chandra Gampa

Dallas, Texas, 75080; +19452444456; [revanthchandrag@gmail.com](mailto:revanthchandrag@gmail.com); <https://www.linkedin.com/in/revanth-chandra-gampa/>

## EDUCATION

### The University of Texas at Dallas

*Master of Science, Computer Science*

Dean's Excellence Scholarship

August 2023 – May 2025

**GPA 4.0**

### Indian Institute of Technology, Madras (IITM)

*Bachelor of Technology, Engineering*

August 2016 – May 2020

**GPA 3.61**

## SKILLS

Languages: Python, Java, SQL, Scala  
Web Development: React, Django, HTML5, CSS3, and RESTful APIs  
Data Engineering: Apache Airflow, ETL pipelines, Big Data tools, data processing and orchestration  
Relevant Courses: Machine Learning, Data Structures and Algorithms, Operating Systems, Database Design  
Cloud Services: Amazon Web Services (AWS), including EC2, S3, and Lambda  
Tools: Git, Docker

## PROFESSIONAL EXPERIENCE

### Caspex, San Jose, California

May 2024 – Present

*Software Development Engineer intern,*

- Designed and implemented data pipelines using Apache Airflow and AWS services to streamline data ingestion, processing, and storage for internal applications.
- Designed and implemented a comprehensive internal application using React and Django, improving user management and project accessibility, resulting in a 35% increase in overall operational efficiency.
- Engineered a secure and scalable user authentication system by integrating okta with JWT tokens, significantly enhancing security and user management.

### Experian, Hyderabad, India

February 2021 – August 2023

*Software Development Engineer*

- Increased efficiency through the implementation of measures preventing duplication of AWS resources during program pauses and resumptions, resulting in substantial cost savings.
- Enhanced application stability and reliability by replacing the previous file-based method of acknowledgement checking with API calls and utilizing a table, reducing error rates by 25%.
- Successfully migrated on-premises processes to AWS cloud, optimizing performance and scalability, leading to a 40% reduction in processing time and significant cost savings.

### Axis Bank, Hyderabad, India

August 2020 – February 2021

*Software Engineer*

- Developed and implemented database programs using Python and SQL to monitor customer risk profiles, leading to a 25% increase in cross-selling conversions and significant business growth.
- Created and published interactive dashboards with Python and Microsoft Excel, enabling real-time tracking of business mix, resulting in data-driven decision-making and a 15% improvement in strategic planning.
- Led the collaborative creation of the PL Acquisition data mart with the Data Engineering team, centralizing PL information, enhancing exception handling, and achieving a 30% reduction in data processing time.

### ClearQuote, Bengaluru, India

May 2019 – June 2019

*Data Scientist Intern*

- Developed a future-proof machine learning model using object detection and OCR to identify car make and model from images, optimizing data verification by 50% and eliminating the need for retraining with new car releases.
- Implemented a specialized WPOD-Net model to extract license plate numbers from skewed angle images, significantly enhancing vehicle recognition capabilities and achieving a 40% improvement in accuracy.
- Leveraged the license plate number extraction model to locate the number plate bounding box, ensuring privacy protection and regulatory compliance.
