

Revanth Kumar Kanapala

Kansas City, MO | +1 (913) 608-8976 | krevanth733@gmail.com

Summary

Java Developer with 4+ years of progressive experience designing, coding, and deploying enterprise applications using Java, J2EE, SQL, and Oracle. Skilled in JSP, Servlets, EJB, and database optimization with strong focus on scalable backend architectures, testing practices, and documentation. Adept at working with cross-functional teams to deliver robust solutions on time and within budget.

Skills

Languages & Frameworks: Java, J2EE, JSP, Servlets, EJB, Spring Boot, JDBC

Databases: SQL, Oracle, PostgreSQL

Cloud & Tools: AWS, Docker, Jenkins, Maven, Git, CI/CD, Deployment Automation

Testing & QA: JUnit, Mockito, TestNG, System Testing, UAT

Design & Architecture: UML, System Architecture, Design Patterns

Documentation: Technical Documentation, Flowcharts, SDD, Release Notes

Experience

Java Developer | University of Missouri-Kansas City | Kansas City, MO

Jan 2023 – April 2024

- Developed and maintained **Java-based enterprise applications**, supporting student, HR, and finance systems with robust backend functionality.
- Designed and **implemented JSP/Servlet modules and REST APIs**, integrating Oracle databases to streamline data access and reporting accuracy.
- Conducted **log analysis, incident resolution, and SQL optimization**, reducing query execution times and improving system response by 25%.
- Participated in **peer reviews, automated unit testing, and UAT cycles**, ensuring reliable software delivery aligned with campus requirements.
- Produced **architecture diagrams, design documents, and API documentation**, enabling knowledge sharing and smooth deployment cycles.
- Supported **release planning, CI/CD pipelines, and deployment automation**, ensuring timely updates with minimal downtime.
- Collaborated with faculty, administrators, and IT staff to gather **requirements, design solutions, and deliver secure backend services**.

Full Stack Developer | Cigniti Technologies | India

Aug 2021 – Dec 2022

- Built and enhanced **Java/J2EE applications** including JSP, Servlets, and EJB modules for multiple enterprise clients.
- Developed and exposed **REST APIs** to integrate with third-party systems, increasing interoperability across client ecosystems.
- Optimized **SQL and Oracle queries** through indexing and query refactoring, improving performance and scalability.
- Executed **unit, system, and regression testing**, reducing post-production defects and enhancing delivery quality.
- Authored **test cases, deployment documents, and API release notes**, aligning deliverables with client and internal standards.
- Conducted **peer code reviews and walkthroughs**, promoting best practices and maintainability across teams.
- Delivered **POCs and technical demos** for client stakeholders, accelerating adoption of new features and integrations.
- Implemented **EJB session beans and multi-tier architectures**, improving modularity and system scalability.
- Debugged and optimized **Java memory usage and exception handling**, strengthening application reliability.

Education

University of Missouri – Kansas City | Master of Science in Computer Science

Dec 2024
