PROFESSIONAL SUMMARY

Data Engineer with 3 years of experience building scalable data pipelines, cloud-native architectures, and analytics solutions. Skilled in Python, SQL, AWS, Azure, Airflow, Glue, and Power BI to automate workflows, improve data accuracy, and drive real-time insights. Proven ability to streamline operations and support strategic decisions through seamless data integration and modeling.

TECHNICAL SKILLS

- **Languages & Scripting:** Python, SQL, PL/SQL, Java, C#, R, Shell/Bash
- **Databases & Modeling:** MySQL, PostgreSQL, Oracle, MS SQL Server, MongoDB, Dimensional Modeling, Data Modeling
- **Big Data & Architecture:** Hadoop (HDFS, Hive/HiveQL, MapReduce), PySpark, SparkSQL, Snowflake, Kafka, Data Lake, Data Warehouse, Delta Lake, Databricks
- **ETL & Orchestration:** SSIS, Apache Airflow, AWS Glue, Azure Data Factory, dbt
- **Frameworks:** Pandas, NumPy, Scikit-learn, TensorFlow, XGBoost, NLTK, Matplotlib, Flask, Regression, Clustering
- **BI & Reporting Tools:** Power BI, Tableau, SSRS, Excel
- **Cloud Platforms:** AWS (S3, Redshift, EC2, Lambda, Glue, CloudWatch), Microsoft Azure (Data Factory)
- **DevOps & Tools:** Git, Jenkins, Docker, Kubernetes, CI/CD, Jira, Agile, SDLC, Data Governance, MS Office
- **Certifications:** [SQL\(HackerRank\)](#), [Problem-Solving \(HackerRank\)](#), [Databricks Fundamentals](#)

PROFESSIONAL EXPERIENCE

Data Engineer

Dec 2022 – Jun 2023

First American

CA, USA

- Optimized complex SQL logic using CTEs, triggers, partitioning, and indexing in Azure SQL Managed Instance; improved query performance by **87%**, directly reducing reporting delays and driving **faster business decision-making**.
- Designed and automated **end-to-end ETL workflows** using SSIS (C#) and Azure Data Factory; achieved **99% data accuracy** and reduced **pipeline downtime by 25%** via schema drift tracking and robust error handling.
- Built and deployed **SSRS reports** and **interactive Power BI dashboards**, improving **data accessibility** and decreasing manual reporting efforts by **85%**, enhancing team productivity.
- Led Agile sprint deliverables to implement **scalable, auditable data architecture** with clear lineage and **data governance best practices**, ensuring **compliance and traceability** for stakeholders.

Data Engineer

Mar 2022 – Nov 2022

Rakuten

India

- Developed and managed **Airflow DAGs** to process and transform incremental data from Hadoop Hive to MySQL using Python, ensured **timely dashboard updates** and proactive issue alerts via **Airflow sensors**.
- Migrated MySQL to Apache Druid using batch ingestion with **Avro** (for schema evolution) and **Parquet**, improving dashboard query speed by 90%.
- Designed **star schema aggregations** and integrated Tableau with Druid for **near real-time KPI dashboards**, supporting **business strategy and leadership reviews**.
- Enabled cost-effective reporting pipelines, reducing query response time and improving scalability for marketing analytics.

Data Analyst

Jan 2021 - Feb 2022

Mobile Premier League

India

- Built scalable AWS Glue pipelines in Python to transform **raw JSON** in-app data into **Parquet** for Redshift, boosting query speed and enabling structured analytics.
- Designed **robust ingestion strategies** for semi-structured event data in S3 with Glue Data Catalog, ensured **99% accuracy** through **automated data quality checks** using SQL and Python.
- Created **interactive Tableau dashboards** showcasing engagement, retention, and monetization metrics, enabling product teams to make **faster, informed business decisions**.
- Improved downstream analytics speed by implementing **partitioning strategies** and schema versioning on AWS data lakes.

ACADEMIC PROJECTS

Sales Analytics Pipeline

- Built an ELT pipeline to automate CSV ingestion into **PostgreSQL**, transform data with Pandas and **dbt**, and stream real-time insights using **Kafka** and **Airflow**, cutting manual reporting by 80% and improving data accuracy.

Fake Review Detection

- A real-time fake review detection web app using Python, Flask, **XGBoost**, and AWS EC2, achieving 90% accuracy and enhancing data quality by reducing misleading reviews.

EDUCATION

University Of Central Missouri, MO | May 2025

Masters in Computer Science, CGPA : 3.6
