

Professional Summary

Result-driven Data Engineer with **3+ years** of experience in designing, developing and deploying scalable data pipelines and ETL workflows across healthcare, financial and consulting domains. Proficient in leveraging cloud platforms like **Azure (ADF, Synapse, Blob Storage, DevOps)** & modern data tools including **Python (Pandas, NumPy)**, **SQL, Snowflake, PostgreSQL, MySQL** and **Oracle** to manage large-scale, high-volume datasets. Demonstrated expertise in **ETL development** using **Informatica** and **Talend**, real-time processing with **Apache Spark & Kafka** & workflow orchestration using **Airflow**. Skilled in building **interactive dashboards** with **Power BI** and **Tableau**, integrating REST APIs and working within Agile environments using JIRA and Git. Adept at transforming raw data into actionable insights and supporting enterprise-level analytics and reporting with strong knowledge of data governance, security and compliance.

Strong collaborator with excellent communication skills, consistently working alongside cross-functional teams to meet data-driven objectives in fast-paced, deadline-driven environments.

Technical Skills

- **End-to-End Data Analysis:** SQL, Python (Pandas, NumPy, SciPy, Scikit-learn), R, Excel
- **Databases:** Snowflake, MySQL, PostgreSQL, Oracle, Microsoft SQL Server, Amazon Redshift, Google BigQuery
- **Cloud Platforms:** AWS (S3, Glue, Redshift, EMR), Azure (Blob, Synapse), Google Cloud (BigQuery, GCS)
- **ETL & Data Integration:** Apache NiFi, Talend, AWS Glue, Azure Data Factory, Informatica
- **Data Visualization & BI:** Power BI, Tableau, Looker (for DataOps & reporting support)
- **Data Warehousing:** Snowflake, Amazon Redshift, Azure Synapse, Google BigQuery
- **Big Data & Distributed Systems:** Apache Spark, Hadoop, Hive, HDFS, Kafka
- **Data Security & Compliance:** HIPAA, GDPR, Data Masking, Encryption, IAM
- **DevOps & Automation:** Airflow, Git, Jenkins, Docker, Terraform
- **Version Control & CI/CD:** Git, GitHub, Bitbucket, Jenkins
- **Others:** REST APIs, JSON, XML, JIRA, Agile/Scrum, SDLC

Work Experience

Data Engineer

Dec 2024 – Present

Citi | New York, NY

- Designing a **real-time trade and market data ingestion pipeline** using **Apache Kafka, Apache Spark Structured Streaming & Apache Airflow**, processing millions of events per hour across Citi's equities, fixed income & FX desks.
- Developed end-to-end **ETL pipelines using Talend and Informatica**, integrating trade, order lifecycle and pricing feeds from multiple front-office trading systems into **Snowflake**, ensuring high data integrity and auditability.
- Building an **AWS-based data lake** architecture using **S3, AWS Glue & Athena**, managing compliance & settlement datasets stored in **Parquet & ORC** formats with schema evolution tracked using **JSON/XML** schema registries.
- Creating **data integration solutions leveraging REST APIs**, ingesting reference data from **Bloomberg, Reuters & internal Citi platforms** into **PostgreSQL & Snowflake**, ensuring **end-to-end encryption & SLA compliance**.
- Empowered front-office traders & risk managers by delivering interactive dashboards in Power BI & Tableau, leading to a **65% increase in user adoption** and **50%** faster access to critical trading insights.
- Engineering **automated data pipelines using Python (Pandas, NumPy), SQL & Apache Spark**, integrating structured and unstructured financial datasets from **Oracle, MySQL** and **PostgreSQL**.
- Implementing scalable data workflows in **AWS (S3, Glue, Lambda)** with **Airflow for orchestration** and **terraform for infrastructure provisioning**, reducing ETL runtime by **40%**.
- Performing **data modeling and performance optimization in Snowflake**, including clustering, partitioning and caching for high-volume BI/reporting workloads.
- Collaborating in an **Agile environment using JIRA**, supporting DataOps with version control (Git), containerization (Docker) and CI/CD pipelines (Jenkins) for production-grade ETL deployments.
- Ensuring **data quality, governance and compliance** using validation checks, profiling, schema enforcement and metadata tracking across **Hadoop, Kafka** and **REST API pipelines**.

- Worked on a **regulatory reporting data platform** for a global banking client, building **batch and real-time pipelines using Apache Spark and Kafka** to process Basel III and IFRS-9 compliance data.
- Developed robust **ETL processes using Informatica and Python**, transforming raw loan, credit card and financial product data into validated schemas for downstream analytics and dashboarding.
- Migrated legacy data processing jobs to the **Azure Data Factory (ADF)** platform, optimizing load times by 30% and enabling scalable orchestration across SQL Server and Blob Storage.
- Implemented **data quality and reconciliation checks** using Excel macros and Python scripts to support audit-readiness for internal and external risk reporting frameworks.
- Designed **interactive Tableau dashboards** to visualize credit risk, portfolio exposure and capital adequacy metrics by integrating curated datasets from Oracle and PostgreSQL.
- Developed and maintained **data pipelines using Python (Pandas, NumPy), SQL and Apache Spark**, processing structured and semi-structured data across multiple RDBMS sources (Oracle, PostgreSQL, MySQL).
- Built scalable **ETL workflows in Azure Data Factory (ADF)** and **orchestrated pipelines using Azure DevOps and Git**, aligning with DevOps standards and improving deployment time by 25%.
- Created and managed **data models and performance-optimized queries in Snowflake and SQL Server**, supporting real-time reporting and financial dashboard solutions.
- Utilized **Informatica and Talend** for **data extraction**, cleansing and transformation across multiple business domains, ensuring data integrity and consistency across layers and reducing error rates by 20%.
- Implemented **data governance, lineage and metadata tracking** using REST APIs, JSON/XML parsing and Agile sprint cycles tracked via JIRA.

- Automated healthcare **ETL jobs using Azure Data Factory triggers and parameterized pipelines**, significantly reducing manual intervention and improving **SLA** adherence for monthly claims data refreshes.
- Participated in **Agile** sprint planning and daily stand-ups, ensuring data tasks were aligned with **JIRA stories**, business logic was correctly implemented and delivery timelines were met across **cross-functional Azure-based pipelines**.
- Developed **data pipelines using Azure Data Factory (ADF)** to ingest and transform patient claims, prescriptions and clinical data for utilization review and cost forecasting.
- Built **data validation scripts using Python (Pandas, NumPy)** to detect anomalies and inconsistencies in healthcare provider and insurance claims datasets sourced from **SQL Server**.
- Leveraged **Azure Synapse Analytics** to process large-scale medical records, optimizing data for downstream **Power BI** reporting on patient outcomes, diagnosis trends and policy utilization.
- Collaborated with data analysts and care management teams to deliver curated datasets using **Azure Blob Storage, Azure SQL and REST APIs**, ensuring compliance with HIPAA regulations.
- Designed and maintained scalable **ETL pipelines using Python and SQL** across relational databases like **PostgreSQL, MySQL and SQL Server**, enabling real-time insights for business users.
- Utilized **Azure Data Factory and Azure DevOps** for orchestrating daily data workflows, integrating source-to-target data lineage, version control (**Git**) and **CI/CD** deployment automation.
- Created **data marts and optimized queries in Snowflake and SQL Server**, supporting healthcare analytics, KPIs and dashboarding initiatives in Power BI and Tableau.
- Performed **data parsing and transformation using JSON, XML and REST APIs**, ensuring consistency in provider feeds, eligibility records and medical benefit usage reports.

Education:

Master of Science in Information Technology University of Cincinnati, OH, USA.

Bachelor of Science in Information Technology, from Sastra Deemed University, India.
