Summary

Experienced Full Stack Developer with 3+ years delivering secure, scalable solutions. Expertise in React Native for cross-platform interfaces combined with Java and Spring Boot for robust backend services, including RESTful APIs and efficient database management. Proven success in enhancing performance through agile methodologies, CI/CD pipelines, and proactive security measures.

Education

Wright State University - Dayton, Ohio

Jan 2023 - Dec 2024

Master of Science, Computer Science

Lovely Professional University - Punjab, India

Jun 2017 - Apr 2021

Bachelor of Technology, Electronics and Communication Engineering

Professional Experience

McKinsey & Company

Jan 2024 - Present

Full Stack Developer

Remote, USA

- Collaborated in an Agile environment to plan and deliver an intelligent client dashboard platform, participating in sprint planning, requirement gathering, and daily standups to ensure the timely release of key features for enterprise clients.
- Engineered interactive frontend components using React.js and Redux Toolkit, implementing dynamic filters, graphs, and tab views to enhance user interface design and application state management, which improved user interaction and usability by 20%.
- Designed and optimized PostgreSQL databases on AWS RDS, enhancing data integrity and query performance by 25% through effective indexing and query tuning, while ensuring comprehensive data security with IAM roles and encryption.
- Developed robust backend services with Spring Boot and RESTful APIs, incorporating JWT-based authentication, exception handling, and detailed logging to bolster application security and scalability as well as seamless data exchange.
- Executed comprehensive unit and integration tests using JUnit and Mockito, achieving 80% test coverage and supporting a CI/CD pipeline implemented via AWS CodePipeline and CodeBuild to reduce deployment issues and accelerate release cycles by 30%.
- Partnered with the DevOps team to containerize applications using Docker and deploy on AWS ECS, configuring S3 for frontend hosting and implementing CloudWatch for performance monitoring and centralized logging.

Accenture Solutions Pvt. Ltd

May 2021 - Dec 2022

Associate Software Developer (Salesforce Developer)

India

- Developed and deployed scalable Salesforce applications using Apex, Visualforce, and Lightning components, ensuring clean, efficient, and maintainable code to meet evolving business requirements.
- Designed complex workflows, validation rules, and approval processes to automate key business functions, significantly increasing operational efficiency and reducing manual efforts across cross-functional teams.
- Enhanced the Salesforce CRM by creating and configuring custom objects, fields, and record types, tailoring data structures to support unique client requirements and improve the overall user experience.
- Built interactive reports and dashboards to deliver critical business insights, enabling stakeholders to make data-driven decisions and monitor key performance metrics in real time.
- Collaborated with QA teams to conduct thorough testing and debugging, identifying and resolving software issues to achieve stable and reliable Salesforce releases.
- Provided ongoing support for Salesforce users by resolving technical issues and implementing enhancements, thereby ensuring smooth platform performance and high user satisfaction.

Technical Skills

- **Frontend:** React.js, Redux Toolkit, Visualforce, Lightning Components, HTML, JavaScript, CSS
- **Backend:** Spring Boot, RESTful APIs, Apex (Salesforce), Node.js, Java
- **Databases:** PostgreSQL (AWS RDS), Salesforce Custom Objects
- **Cloud & DevOps:** AWS (ECS, S3, CodePipeline, CodeBuild, CloudWatch, IAM), Docker
- **Testing:** JUnit, Mockito
- **Tools:** Git, Agile (Scrum), CI/CD pipelines, Full Development Lifecycle
- **Salesforce:** Workflow Rules, Validation Rules, Approval Processes, Reports, Dashboards
