AWS DevOps Engineer

AWS Cloud Infrastructure Management | CI/CD Automation | Containerization & Deployment

AWS Certified SysOps Administrator and DevOps Engineer with 3+ years of experience in cloud infrastructure, CI/CD, and AWS services (EC2, S3, RDS, CloudFormation). Skilled in automation (Python, Bitbucket Pipelines, Jenkins), containerization (Docker), and performance optimization (CloudWatch). Collaborative team player passionate about delivering scalable, reliable cloud solutions.

WORK EXPERIENCE

Palni India Pvt Ltd - Hyderabad, Telangana

February 2022 – September 2023

AWS DevOps Engineer

Developed and managed cloud-based solutions, leveraging AWS services and DevOps tools to ensure secure, scalable, and high-performing infrastructure

- Designed and managed infrastructure across diverse AWS services using CloudFormation and Terraform.
- Orchestrated containerized applications with Kubernetes, enabling scalable deployments.
- Automated CI/CD pipelines with Bitbucket Pipelines and AWS Developer Tools, Integrating continuous testing tools to enhance deployment quality
- Monitored and optimized performance using CloudWatch, reducing downtime and ensuring reliability.
- Containerized applications with Docker and ECR for seamless deployment across environments..
- Secured access with IAM roles and policies, enabling robust access control.
- Automated tasks with Python and leveraged Ansible for consistent infrastructure provisioning.
- Worked extensively with SQL for data integration and application performance optimization.
- Championed Agile methodologies, participating in Scrum meetings to improve team collaboration and project delivery

Grepthor Software Solutions Pvt Ltd - Hyderabad, Telangana

April 2020 – February 2022

AWS DevOps Engineer

Built and maintained secure cloud environments, streamlining deployments and ensuring optimal performance for enterprise applications

- Deployed and managed cloud infrastructure using AWS services, including EC2, S3, RDS, and IAM, achieving 99.9% uptime.
- Automated build and deployment tasks using Jenkins CI pipelines, reducing manual effort by 40%.
- Configured S3 bucket replication and lifecycle policies, optimizing storage and improving data management.
- Deployed applications on Tomcat servers and Docker containers to standardize environments and improve consistency.
- Collaborated with cross-functional teams to resolve deployment issues, ensuring high availability and smooth project delivery.
- **Demonstrated leadership** by taking the initiative to optimize deployment pipelines, significantly reducing manual intervention.

EDUCATION

Cumberland University - *lebanon , Tennessee*

Master of Science – Information Technology Project Management , August 2023 - May 2025

Gurunanak Institutions And Technical Campus - *Hyderabad, Telangana*

Bachelor of Technology – Computer Engineering , June 2015 - April 2019

PROFESSIONAL SKILLS

- **Cloud Platform:** Amazon Web Services (AWS)
- **Operating Systems:** Linux, Windows
- **AWS Services:** EC2, VPC, S3, SQS, SNS, IAM, EFS, RDS, CloudWatch, CloudTrail
- **Queue Services:** Amazon SQS, Apache Kafka
- **Monitoring Tools:** CloudWatch, CloudTrail
- **Servers:** Apache Tomcat 8
- **Source Control Management (SCM):** Bitbucket, GitHub
- **Build Tools:** NgBuild, Maven
- **DevOps Tools:** Docker, Git/GitHub, Bitbucket, SonarQube, Terraform, Kubernetes, Ansible, Jenkins, CloudFormation (CFT)
- **CI/CD Tools:** AWS Developer Tools, Bitbucket Pipelines, Jenkins
- **Programming Languages:** Python
- **Query Languages:** SQL
- **Data Engineering Tools:** Apache Hadoop, Apache Spark, Apache Kafka, AWS Glue, AWS Redshift, Apache Airflow, Data Pipeline

CERTIFICATIONS

- AWS Cloud Practitioner (May 2022 - November 2025)
- AWS SysOps Administrator (November 2022 - November 2025)
