EDUCATION

Georgia Institute of Technology

M.S. in Computer Science (part-time, Computing Systems Specialization)

Atlanta, GA

Fall 2024 – Fall 2026

University of California, San Diego

B.S. in Data Science & Cognitive Science (Machine Learning Specialization)

San Diego, CA

Spring 2023

EXPERIENCE

Bank of America

Financial Data Analyst II (AVP, Contractor)

Charlotte, NC

Fall 2024 – Present

- Partnered with C-suite executives and developed Python scripts and SQL workflows to automate DoD validation processes, improving system reliability by 30%.
- Re-engineered legacy R scripts into optimized, scalable SQL pipelines for month-end reconciliation, improving reliability and achieving 100% accuracy.
- Owned and enhanced three critical data validation systems, implementing automated workflows to improve data quality and maintain scalability.

Wells Fargo

Data Analyst

Charlotte, NC

Summer 2023 – Fall 2024

- Designed and implemented a Data API for two financial products, enabling scalable backend integrations and improving system efficiency by 70%.
- Built automated ETL pipelines using Python and SQL, ensuring robust data validation and reliable operations.

National Institute on Aging

Data Research Intern

La Jolla, CA

Winter 2020 – Spring 2023

- Deployed and maintained a scalable server for Leaf Query Database using Docker, ensuring reproducibility and enabling cross-team data access.

PROJECTS

Portfolio Website -- Email/GitHub API | TypeScript, PostgreSQL, Docker

Spring 2025 –

- Developed a RESTful email API to handle subscriptions and user questions, including backend database design and automated workflows.
- Integrated unit tests and CI/CD pipelines for continuous deployment and high code quality.
- Built a backend service to track daily GitHub commits, using the GitHub API to fetch user data and store it in PostgreSQL.

Scholarship Data Visualization Website | TypeScript, JavaScript, Tailwind, Vercel, APIs

Spring 2025

- Built a responsive, interactive website for scholarship and FAFSA information, using charts and graphs to provide clear visualizations for users.
- Integrated backend APIs for data collection and cleaning, transforming raw datasets into actionable insights for the frontend.
- Implemented modern frontend frameworks with TypeScript and Tailwind for scalable, maintainable, and visually appealing interfaces.
- Deployed the website on Vercel, ensuring high availability and seamless user access (View Site).

DeepGLEAM Case Study | Python, PyTorch, R, Time-Series Forecasting

Fall 2022 – Spring 2023

- Optimized the DeepGLEAM model for flu prediction, reducing error by 11.85% through advanced interpolation and imputation techniques.
- Merged MLP and DeepGLEAM models, improving accuracy over traditional forecasting methods.

TECHNICAL SKILLS

Languages: Python, Java, C++, SQL, JavaScript, TypeScript, HTML/CSS

Frameworks/Tools: Flask, FastAPI, PyTorch, TensorFlow, scikit-learn, Java Spring Boot, Docker, Git, Jupyter

Databases: PostgreSQL, MySQL, NoSQL (MongoDB, Cassandra), Delta Lake, Clickhouse

Software Development: AWS, GCP, CI/CD pipelines, Agile/Scrum
