WORK EXPERIENCE

Wasserman

May 2022 – Present

Data Analyst

Los Angeles, CA

- Gathered social media metrics to build and update daily and weekly Excel reports tracking campaign performance; used pivot tables and lookup formulas to aggregate data and deliver timely insights for clients.
- Created 10+ custom Tableau dashboards by cleaning, aggregating, and preparing raw data from diverse sources using Python, supporting client-specific reporting needs and enabling deeper insights into clients' audiences.
- Delivered ad-hoc Excel reports and Tableau dashboards to support social media campaign tracking, providing timely insights that informed strategy adjustments and improved campaign performance.

Trusaic

Dec 2021 – Dec 2022

Data Operations Coordinator

Remote

- Transformed and validated client data from HR, payroll, and benefits systems using R and Alteryx across 30+ client accounts, ensuring clean and structured datasets for analytics and compliance reporting.
- Built client-facing reports in Excel using Power Query to highlight KPIs, risk indicators, and workforce trends, helping identify compliance risks and avoid thousands in IRS tax penalties.
- Coordinated secure extraction, ingestion, and transformation of sensitive data from multiple enterprise systems, ensuring data integrity and enabling accurate analytics and reporting with over 95% deliverable accuracy.

Hyundai Motors America

Dec 2020 – Dec 2021

Parts Analyst

Remote

- Developed weekly Excel reports tracking key supply chain KPIs related to car part inventory, enabling supply analysts to identify bottlenecks and reduce backorders by up to 15%, improving overall operational efficiency.
- Utilized SQL to collect, clean, and aggregate supply chain data for ad-hoc inquiries related to car parts fulfillment across national dealerships, delivering timely churn reports to support operational decision-making.
- Initiated and developed an interactive Tableau dashboard to monitor dealership survey completion rates across regions, enabling stakeholders to target follow-ups and drive overall survey completion to 92%.

SKILLS

Data Analysis & Reporting

SQL (data queries, troubleshooting, data reconciliation), Excel (pivot tables, lookup formulas, automation), Tableau (dashboarding, KPI tracking, calculated fields), Ad-hoc report generation

Data Management & Quality Assurance

Data cleansing, transformation, validation, performance tracking, report standardization, root-cause analysis

Tools & Platforms

Excel (Power Query, advanced formulas), Tableau, MySQL, PostgreSQL, Python (data analysis, data prep)

EDUCATION

University of California Irvine

May, 2020

B.S., Mathematics

Irvine, CA

Cerritos College

June, 2018

A.S., Mathematics

Norwalk, CA
