

DATA ANALYST | DATA ENGINEER | BUSINESS INTELLIGENCE DEVELOPER

Results-driven Data Analyst with 6+ years of experience in **analytics, engineering, and BI** across banking, finance, and enterprise systems. Skilled in SQL, Python, Tableau, Power BI, and Snowflake for building ETL workflows, data models, and automated dashboards. Proven record of optimizing operations, enhancing data quality, and enabling strategic business decisions through automation and predictive analytics.

TECHNICAL SKILLS

Analytics & BI Tools: SQL, Python (Pandas, NumPy, Scikit-learn), Power BI, Tableau, Looker, Excel
Data Engineering & ETL: Snowflake, Azure Data Factory, Airflow, Alteryx, PySpark, Kafka, dbt
Cloud & Platforms: Azure, AWS, GCP, GitHub, JIRA, Databricks, BigQuery
Machine Learning & Modeling: Regression, Classification, Time Series Forecasting, NLP, Deep Learning
Concepts: Data Warehousing, Data Modeling, KPI Design, Data Storytelling, Predictive Analytics, Statistics, Automation

PROFESSIONAL EXPERIENCE

The Bank of Missouri – Data Analyst Intern (Remote) | Perryville, MO (June 2025 – September 2025)

- Managed and analyzed **BIN Sponsorship Program data**, leveraging **Snowflake, Python, and Tableau Cloud** to optimize card portfolio and partner performance.
- Designed **end-to-end ETL (Extract, Transform, Load) workflows**, cutting manual processing time by **40%** and improving reporting timeliness.
- Implemented automated **Tableau refresh and data pipeline execution**, reducing human error and operational delays.
- Developed **forecasting and risk analytics models (XGBoost, Linear Regression)** to project portfolio growth and credit trends.
- Partnered with Risk & Compliance teams to improve governance and compliance using RSA Archer.
- Led a **data quality monitoring framework** that increased data integrity checks by 25%.

N1 Solutions LLC – Data Analyst Intern | Frisco, TX (May 2024 – August 2024)

- Analyzed **10M+ HR records** using **SQL and Alteryx**, achieving **99% data accuracy** across **workforce analytics** metrics.
- Developed **Power BI dashboards** for HR KPIs, improving data visibility and accelerating executive decisions by **30%**.
- Automated validation scripts in **Python**, minimizing repetitive checks and ensuring consistency across data sources.
- Authored technical **documentation** and dashboard user guides to support non-technical stakeholders.
- Implemented **data anomaly detection logic** using Python, proactively flagging irregularities before reporting cycles.

Dev Information Technology Ltd. – Data Engineer | Ahmedabad, India (March 2022 – July 2023)

- Engineered **ETL pipelines and workflows in Azure Data Factory** integrating geospatial and transactional data from multiple APIs for the Marine Vessel Tracking system.
- Designed and optimized **SQL queries** and data models, improving data refresh speed by **35%**.
- Automated **data transformation and validation** processes, ensuring reliability and scalability of downstream analytics.
- Integrated **payment gateway data** to enable comprehensive financial and operational reporting.
- Partnered with analysts to develop **Power BI dashboards**, improving vessel monitoring efficiency by **20%**.

Tectona Soft solutions Pvt. Ltd. – Data Engineer | Ahmedabad, India (May 2019 – February 2022)

- Engineered **Cassandra-based data pipelines** for an **E-Invoicing system**, enhancing scalability and real-time data access.
- Automated **financial data reconciliation**, reducing manual intervention and processing errors by 45%.
- Partnered with finance and compliance teams to enhance data architecture and streamline audits.
- Migrated legacy ETL processes to **Airflow**, reducing runtime by 25% and improving reliability of nightly jobs.

CERTIFICATIONS

Databricks Fundamentals Accreditation - **Databricks Academy**
DataCamp Courses - Generative AI Concepts | LLM Concepts | Cleaning Data with Generative AI | Time Series Analysis with Python | Exploratory Data Analysis in Python | Deep Learning with PyTorch | Understanding Data Science

PROJECTS

- Chatbot Development:** Designed a conversational AI chatbot using **DialogFlow CX** for car rental bookings, improving customer response efficiency.
- Crash Data Analysis:** Built Random Forest and Logistic Regression models to predict crash severity with 89% accuracy.
- Election & Stock Market Analysis:** Developed **Regression and Random Forest** models in Python to forecast election effects on stock trends, identifying strong correlations with market performance.

EDUCATION

MS in Advanced Data Analytics - University of North Texas | Denton, TX | 2023 – 2025 (GPA – 4.0)
Master of Computer Application - Nirma University | Ahmedabad, India | 2013 – 2016
Bachelor of Computer Science - South Gujarat University | Surat, India | 2010 – 2013
