

Rishi Achavelli | Java Full Stack Developer

Location: NJ | Phone: (908) 524-0933 | Email: achavelliri@gmail.com | LinkedIn

SUMMARY

Experienced Java Full Stack Developer with over 5 years of expertise in developing and enhancing web applications across the Healthcare and Finance sectors. Skilled in designing scalable solutions using Java, Spring Boot, Hibernate, and Microservices Architecture, with strong front-end experience in Angular, JavaScript, and HTML5. Proficient in managing databases such as MySQL and Oracle DB, along with leveraging cloud platforms like AWS and implementing CI/CD pipelines using Jenkins and Docker. Adept at collaborating with cross-functional teams in Agile environments to deliver high-performance solutions. Demonstrated success in improving system efficiency, ensuring data security, and enhancing customer experience through innovative and effective solutions.

SKILLS

Programming Languages:	Java, Python, JavaScript, SQL, C, C++
Frontend Development:	Angular, React, Vue.js, Node.js, JavaScript, TypeScript, HTML5, CSS3
Backend Development:	Spring Boot, Spring Framework, Hibernate, RESTful APIs, GraphQL, Microservices Architecture
Database Management:	MySQL, Oracle DB, PostgreSQL, MongoDB, DynamoDB, DB2, SQL Server
Cloud & DevOps:	AWS (EC2, S3, Lambda, Glue, CloudWatch, Athena, Elastic Beanstalk), Docker, Kubernetes
Tools & CI/CD:	Maven, Git, SVN, JIRA, Jenkins, Travis CI, AWS Code Pipeline, IntelliJ IDEA, Visual Studio Code
Testing & Agile:	JUnit, JMeter, Mockito, Selenium, Postman, REST Assured, Scrum, Kanban
Others:	Power BI, Tableau, Prescription Management Systems, HIPAA Compliance Tools, Loan Origination and Management Systems (LOMS), Credit Risk Assessment Tools

EDUCATION

Master's in science in Computer Science Webster University, USA	Aug 2024
Bachelors in Computer Applications Bhavans Vivekananda College of Science, India	May 2018

EXPERIENCE

Walgreens, USA Java Full Stack Developer	Oct 2024 – Present
- Developed and enhanced the Prescription Management System, enabling seamless integration between pharmacy inventory, patient records, and prescription order tracking using Java, Spring Boot, and Hibernate. - Designed and implemented RESTful APIs to manage prescription data, ensuring secure data exchange between front-end interfaces and backend services in compliance with HIPAA regulations. - Created dynamic, user-friendly web interfaces using Angular, HTML5, and CSS3 to allow pharmacists to track, verify, and dispense prescriptions efficiently. - Integrated AWS S3 for secure prescription document storage and leveraged AWS Lambda for automated data processing tasks such as prescription expiry alerts and refill notifications. - Developed robust unit tests using JUnit and conducted integration testing to ensure system stability and high performance. - Utilized Jenkins for CI/CD pipelines to automate build, test, and deployment processes, enhancing deployment efficiency by 30%. - Collaborated with cross-functional teams including pharmacists, data analysts, and QA engineers to gather requirements, troubleshoot issues, and ensure project milestones were met in an Agile environment using JIRA for task tracking.	
I Sparrow, India Java Developer	Sep 2021 to Dec 2022
- Developed and maintained the Loan Origination and Management System (LOMS) to streamline loan application processing, credit verification, and disbursement workflows using Java, Spring Boot, and Hibernate. - Designed and implemented Microservices Architecture to improve scalability, ensuring secure and efficient communication between customer profiles, credit risk assessments, and loan approval modules. - Created and optimized RESTful APIs for real-time data exchange between the bank's core system, credit bureaus, and third-party financial services. - Developed dynamic front-end screens using Angular, JavaScript, and HTML5 to allow banking staff to manage customer profiles, loan applications, and repayment schedules efficiently. - Utilized Jenkins for CI/CD pipelines, ensuring seamless build, testing, and deployment of new features across multiple banking branches in an Agile environment using JIRA for sprint planning and tracking. - Implemented database procedures and optimized complex SQL queries in Oracle DB to manage large volumes of financial data with improved query performance.	

I Sparrow, India
Software Developer

Dec 2017 to Aug 2021

- Assisted in the development of a scalable enterprise web application for an IT solutions provider, contributing to both front-end and back-end development using Java, Spring Boot, Angular, and PostgreSQL.
- Collaborated with senior developers to design and implement RESTful APIs, improving application performance and enabling seamless data exchange between microservices.
- Participated in the Agile development lifecycle, attending daily stand-ups, sprint planning meetings, and contributing to code reviews using Git, Jira, and Confluence.
- Worked on database design and optimization, writing complex SQL queries and stored procedures in PostgreSQL to enhance data retrieval efficiency.
- Assisted in the implementation of CI/CD pipelines using Jenkins, Docker, and Kubernetes, ensuring automated deployment and smooth integration of new features.
