**Backend and Database:** SQL, mariaDB

**Tools:** Git, Docker, Visual Studio, RStudio, Google Workspace

**Operating Systems:** Windows, Mac OS

## WORK EXPERIENCE

**Facilities Operations Support Tech at NC State University**

Sep 2024 – Jan 2025

- Led a team in managing facility operations, supporting research, events, and sustainability initiatives.
- Coordinated maintenance schedules and logistics to ensure a safe and efficient work environment.
- Developed sustainability projects, enhancing energy efficiency and waste management practices.
- Managed cross-functional communication between students, and staff to optimize workflows.

**Data analytics and Fraud detection Research Assistant at NC State University.**

Aug 2022 – Oct 2022

- Assisted in research on audit quality and fraud detection, contributing to the project "Enhancing Professional Skepticism in Auditing: The Role of Company Board Subcommittees."
- Applied data analytics techniques to financial statement reviews, identifying potential fraud indicators.
- Worked with leading firms to analyze and enhance corporate audit practices.

**Real Invest — Investment Portfolio Analyst Intern**

May 2023 – Aug 2023

- Designed tailored investment strategies that optimized risk-adjusted returns, leading to an 20 - 25% increase in portfolio performance.
- Researched and analyzed market trends, identifying high-growth investment opportunities.
- Collaborated with senior financial advisors to develop client-specific investment plans.

## TECHNICAL PROJECTS

**Wolf Scheduler (Java)**

- Developed a Java-based course scheduling app that automatically suggests optimal schedules for students.
- Implemented an efficient algorithm that minimizes conflicts and improves usability.

**Student Manager (Java)**

- Built an interactive GUI application to track course enrollments and calculate GPA in real-time.
- Enabled seamless user input with a dynamic and responsive interface.

**Livestock Price Website (JavaScript)**

- Developed a real-time stock price monitoring website for livestock markets using JavaScript and API integration. Improved user experience by designing an interactive and responsive front-end.
