

Rishik Katam *Full Stack Developer*

✉ Rishikkatam333@gmail.com 📞 +1 (857) 339-9488 📍 Weymouth, MA 🔗 LinkedIn

Summary

Full Stack Developer with 4+ years of hands-on experience designing, developing, and deploying scalable web applications using Java, Spring Boot, React.js, and AWS. Proven expertise in microservices architecture with Spring Cloud, Eureka, and Kafka, enabling high-performance, distributed systems. Adept at building secure RESTful APIs with OAuth 2.0, JWT, and Spring Security, and deploying cloud-native applications using Docker, Kubernetes, and AWS services (EC2, S3, RDS). Strong front-end skills with React.js, Next.js, and Redux, focused on performance, responsiveness, and state management. Skilled in CI/CD automation (Jenkins, Maven), NoSQL/MySQL databases, and Agile methodologies, with a commitment to clean code, version control (Git), and quality assurance through JUnit and Mockito.

Skills

Technical Skills

Languages : C, C++, Java, JavaScript, Python, SQL, MATLAB, HTML, CSS
Frameworks : Express, Mongoose, Node.js, React, Spring, Spring boot, Redux, Angular, React Native
Databases : Oracle PL/SQL, MySQL, MongoDB, DynamoDB, Postgres, SQLite
Cloud & other protocols : AWS- S3, EC2, RDS, Cloud Watch CI/CD, Lambda, TCP/IP, UDP, HTTP
Other Tools : Git version control system, JIRA, Virtual Box, Figma, Adobe XD, Balsamiq, Axure RP

Professional Experience

Full Stack Developer, Verizon Communications Inc 02/2025 – present | Boston, MA

- Built and deployed scalable RESTful microservices using Spring Boot and supporting seamless service discovery, API management, and client-side load balancing— achieving response times consistently under 30ms in production.
- Developed dynamic, responsive front-end applications using ReactJS, Redux, and Redux-Saga to enhance user experience on high-traffic platforms, ensuring performance, reusability, and modularity across digital service interfaces.
- Integrated Spring Security and OAuth2 for secure authentication and authorization across microservices, enabling robust protection of user data and ensuring compliance with enterprise-grade security policies.
- Deployed and maintained highly available cloud infrastructure on AWS, including EC2, S3, Load Balancers, and CloudWatch for scalable deployment, real-time monitoring, and fault-tolerant systems.
- Implemented CI/CD pipelines using Jenkins and Maven, automating build, test, and deployment workflows to streamline the software delivery lifecycle while reducing manual overhead and increasing release velocity.
- Leveraged Apache Kafka for distributed messaging and streaming, creating scalable data pipelines to process real-time events between services supporting initiatives in IoT, monitoring, and data-driven platforms.

Software Engineer Co-op, DXC Technologies 01/2024 – 08/2024 | Tampa, FL

- Spearheaded API security enhancements utilizing Spring Security and OAuth 2.0, fortifying authentication layers and reducing unauthorized access incidents by 15% within the application.
- Built high-performance, SEO-friendly UIs with Next.js (SSR/SSG) and optimized React applications for reduced load times.
- Enabled real-time communication using WebSocket (Node.js) and asynchronous data flows with Apache Kafka for seamless user experiences.
- Engineered resilient microservices using Java 17+ (Collections, Multi-Threading) and Java 8 (Lambda/Streams), integrated Reactive programming for non-blocking systems, and enhanced scalability via Spring Eureka for service discovery and load balancing.
- Architected scalable NoSQL database architecture using DynamoDB, supporting 5,000+ concurrent users and reducing data retrieval latency by 60 milliseconds; enabled real-time session management. • Orchestrated AWS infrastructure using CloudFormation, encompassing EC2, S3, and RDS, alongside building CI/CD pipelines with Jenkins for continuous delivery, cutting down deployment times by 30%.

Software Engineer I, Quality Austria Central Asia Pvt Ltd 01/2021 – 08/2022 | Hyderabad, India

- Developed full stack applications using Core Java, Spring Boot, and React.js, built robust RESTful APIs and microservices deployed on AWS EC2, enhancing application scalability and performance.
- Pioneered responsive, cross-browser compatible interfaces using HTML5, CSS3, and TypeScript, converting UI/UX wireframes into functional web pages with AJAX features; elevated user engagement by 40% and lowered bounce rates by 25%.
- Implemented CRUD operations using MySQL and DynamoDB, integrated third-party APIs, and applied Core Java concepts including Collections, Exception Handling, and Multithreading, enhancing data processing efficiency.
- Engineered CI/CD pipelines using Maven, Jenkins, and Docker, slashing deployment times by 60% and improving system uptime by 15% through automated build & deployment processes.
- Ensured code quality through unit testing with JUnit and React Testing Library, collaborated with team members to gather requirements and deliver features on time, maintaining comprehensive documentation for workflows and troubleshooting, which improved team efficiency by 20%.

Software Engineer Intern, Quality Austria Central Asia Pvt Ltd 04/2020 – 12/2020

- Collaborated in a full stack team to design and develop customer-facing web applications using HTML, CSS, JavaScript, Bootstrap, React and Java. Resulted in a 20% reduction in UI feature delivery time.

Education

Northeastern University, Master of Science in Software Engineering Systems 09/2022 – 12/2024 | Boston, MA

Vellore Institute of Technology, Vellore, Tamil Nadu
Bachelor of Engineering in Electronics and Communication Engineering

Certificates

AWS Certified Solution Architect – Associate (Active)
