

Rishitha Abbineni

Data Analyst

Location: Birmingham, AL | **Phone:** (205) 946-9999 | **Email:** abbinenirishitha220@gmail.com | [LinkedIn](#)

Summary

- Over 3 years of professional experience as a Data Analyst, specializing in data analysis, machine learning, and business intelligence.
- Proficient in Python and SQL, with expertise in building and automating ETL pipelines using tools like Apache Airflow, Alteryx, and Talend.
- Skilled in creating interactive dashboards using Power BI and Tableau to monitor KPIs and support data-driven decision-making.
- Hands-on experience with data engineering tools such as Snowflake, AWS Redshift, and S3 for scalable data storage and processing.
- Adept at data wrangling, statistical analysis, and visualization to derive actionable insights and optimize business processes.
- Implemented machine learning models for predictive analytics using techniques like regression, decision trees, and clustering.
- Strong knowledge of data governance and compliance standards, ensuring data integrity and security across workflows.
- Experienced in collaborating with cross-functional teams to translate business needs into technical solutions and improve operational efficiency.

TECHNICAL SKILLS

- **Programming Languages:** Python, SQL
- **Databases & Data Warehouses:** PostgreSQL, SQL Server, MySQL, Snowflake, Teradata, BigQuery
- **Data Visualization:** Power BI, Tableau, Advanced Excel
- **Libraries & Frameworks:** NumPy, Pandas, Matplotlib, Plotly, Seaborn, Streamlit, FastAPI
- **Data Engineering:** Alteryx, Talend, Informatica, Apache Airflow, dbt
- **Cloud Platforms:** AWS (Redshift, DynamoDB, S3, Athena, Lambda)
- **Methodologies:** SDLC, Agile (Scrum), Waterfall
- **Version Control:** Git, GitHub
- **ML Techniques:** Regression, KNN, Decision Tree, Naive Bayes, Random Forest
- **Healthcare Tools & Technologies:** HIPAA, EMR, HER
- **Analytical Skills:** Data Mining, Data Cleansing, Statistical Analysis, Data Visualization, Text Mining, ETL, Data Wrangling, Data Warehousing, Time Series Analysis, A/B Testing, SAP, SAS

Work Experience

Dell Technologies

August 2023 – Present

Data Analyst

- Extracted and analysed performance data using SAS and Python, delivering actionable insights that improved operational efficiency and product reliability, reducing downtime by 15%.
- Utilized SAP ERP systems for data extraction and inventory tracking, enabling real-time monitoring and decision-making across supply chain operations.
- Designed and implemented data governance frameworks, ensuring consistency and compliance across data sources and analytical models.
- Built time-series forecasting models to predict trends and optimize resource allocation, enhancing long-term strategic planning.
- Created interactive visualizations using Power BI, simplifying complex data for non-technical stakeholders and driving informed decision-making.
- Conducted statistical hypothesis testing to evaluate product performance metrics, identifying areas for improvement in product design and support services.

- Collaborated with IT teams to enhance data security protocols, safeguarding sensitive information and ensuring compliance with industry standards.
- Facilitated cross-departmental workshops to identify analytics requirements, aligning data solutions with business objectives and stakeholder expectations.

Infosys BPM

January 2020 – December 2021

Data Analyst

- Conducted data mining and statistical analysis to support client reporting and decision-making processes.
- Created dashboards in Tableau to visualize operational metrics and identify performance bottlenecks.
- Streamlined ETL processes using Alteryx, improving data preparation efficiency by 30%.
- Designed SQL queries to extract and transform data from PostgreSQL and Snowflake databases for reporting purposes.
- Collaborated with business stakeholders to gather requirements and develop custom reporting solutions.
- Applied machine learning techniques such as regression and classification to predict customer behaviour.
- Optimized data pipelines using Talend and Informatica, ensuring data quality and integrity across systems.
- Automated repetitive data validation tasks using Python, reducing manual effort by 10%.

Projects

Inventory Optimization and KPI Dashboard

- Built a Python-based ETL pipeline to integrate inventory data into a Snowflake data warehouse, reducing data processing time by 20%.
- Designed real-time Power BI dashboards to visualize inventory trends and monitor KPIs, enabling proactive decision-making.

Sales Data Analysis and Automation

- Developed SQL queries to extract and analyse sales performance data, delivering insights on customer trends and revenue drivers.
- Automated repetitive reporting tasks using Python and integrated the output with Tableau for dynamic visualization.

Healthcare Analytics: Patient Risk Prediction

- Designed a logistic regression model using Python to predict patient risk based on historical health records with 80% accuracy.
- Conducted SQL-based data cleansing and analysis to preprocess EMR data for feature extraction and model training.

Education

Master of Science, Computer Science

Jan 2022 – April 2023

University of Alabama, Birmingham, AL

Bachelor of Technology, Computer Science

Aug 2017 – Jun 2021

Abdul Kalam Institute of Technological Sciences, India
