

Rishitha Komatreddy

Java Full Stack Developer

St louis, MO | +1 (732) 209 4408 | rishitha@quickitmail.com | [LinkedIn](#)

SUMMARY

- Java Full Stack Developer with 3+ years of experience in designing, developing, implementing, and testing web-based applications across all stages of the SDLC, utilizing Agile and Waterfall methodologies.
- Proficient in Java and J2EE technologies, including Servlets, JSP, JDBC, JavaBeans, and JSTL, with expertise in open-source frameworks such as Spring Boot, Spring MVC, Spring Security, Hibernate, and Microservices for developing scalable and high-performance applications.
- Experienced in front-end development using React.js, Node.js, HTML, CSS, and JavaScript, specializing in Single Page Applications (SPA) to enhance user experience and responsiveness.
- Skilled in building RESTful APIs and integrating backend services with modern front-end frameworks.
- Strong background in relational and NoSQL databases, with expertise in developing optimized SQL queries and stored procedures for efficient data management.
- Adept at system architecture design, performance optimization, and troubleshooting, ensuring robust and scalable application development.

SKILLS

Methodologies: SDLC, Agile, Waterfall

Languages: Core Java, Java 8/11, SQL

Frameworks: Spring (MVC, Boot, Security), Microservices, Hibernate, JPA, JSF, React.JS, Vue.JS, Node.JS, Angular.JS

IDEs: NetBeans, IntelliJ IDEA, VS Code, Eclipse

J2EE Technologies: Servlets, JSP, JSTL, JavaBeans, JDBC, Java Mail

Web Technologies: HTML, CSS, JavaScript, TypeScript, Bootstrap, jQuery, Ajax, JSON, XML

Cloud Technologies: AWS (VPC, EC2, S3, CloudFront, ELB, Redshift), Azure, GCP

Application Server: Apache Tomcat, IBM Web Sphere

Databases: MySQL, SQL Server, PostgreSQL, Oracle, MongoDB

Version Control/Other Tools: Git, GitHub, GitLab, Maven, Gradle, Jira, Jenkins, Junit, MS Excel, JMeter

Operating Systems: Windows, Linux, Mac

EXPERIENCE

State Street, USA | Java Full Stack Developer

Aug 2024 - Present

- Instigated Agile development methodology, facilitating collaboration between business users and technical teams to ensure seamless project execution.
- Enhanced and optimized stored procedures using Java 8, Jenkins, and Microservices architecture, improving order-to-invoice reconciliation efficiency and significantly reducing processing time.
- Constructed and deployed web applications using Spring MVC, jQuery, and Bootstrap, leveraging Multithreading and Collections Frameworks to enhance application responsiveness.
- Designed and refined numerous RESTful APIs, seamlessly integrating them with React.js and Angular-based front-end applications, leading to improved data exchange efficiency and enhanced user responsiveness.
- Installed AWS Cloud Management applications, ensuring efficient cloud infrastructure performance and scalability.
- Optimized MySQL database performance, reducing query execution time by 40% through SQL fine-tuning, indexing, and efficient stored procedures, improving data retrieval and application efficiency.

Mphasis, India | Java Full Stack Developer

Nov 2020 - Apr 2023

- Developed secure and scalable healthcare applications to enhance patient care, interoperability, and efficiency while ensuring HIPAA and GDPR compliance in cloud-based environments.
- Led SDLC phases, including analysis, development, and testing, for AI-driven claims processing and fraud detection solutions using Agile and Waterfall methodologies.
- Implemented Hibernate ORM for efficient healthcare data storage and retrieval, optimizing integration with electronic health records (EHRs) and improving database performance.
- Designed and deployed RESTful APIs with Spring Boot and Node.js, enabling secure healthcare data exchange with 99% uptime and optimized low-latency performance.
- Developed J2EE-based applications using JSP, Servlets, and JavaBeans to support intelligent claims processing and digital patient engagement solutions.
- Integrated Azure Active Directory (AAD) for secure authentication and access control, ensuring patient data security and regulatory compliance in healthcare applications.
- Built responsive SPAs using ReactJS, JavaScript, and HTML/CSS, collaborating with UI/UX teams to create user-friendly healthcare dashboards and portals.
- Automated unit testing with JUnit, achieving 85% test coverage, reducing defects by 50%, and ensuring reliability in mission-critical healthcare applications.

EDUCATION

Masters in Information Technology and Management

Dec 2024

Webster University

Webster Groves, MO
