

RISHITHA RIKKALA
JAVA FULL STACK DEVELOPER

 **+1 (940) 331-1809** |  **r.rikkala39@gmail.com** |  **linkedin.com/in/rishitharikkala**

Summary

Java Full Stack Developer with 4+ years of experience in the full SDLC, specializing in building scalable microservices with Spring Boot, AWS (EC2, S3, Lambda), and REST APIs. Skilled in ReactJS, Redux, and Webpack, delivering responsive and user-centric applications. Experienced in real-time data processing using Kafka and RabbitMQ. Adept at deploying applications via Docker, Jenkins, and AWS ECS. Proven ability to optimize performance, manage APIs with Apigee, and ensure robust cloud integration. Committed to Agile, TDD, and delivering clean, maintainable code.

Skills

- **Languages:** Java 8+, JavaScript, TypeScript, SQL, HTML5, CSS3
- **Backend & Frameworks:** Spring Boot, Spring MVC, Spring Security, RESTful APIs, Hibernate, JPA, Microservices
- **Frontend Technologies:** ReactJS, Redux, Angular, Bootstrap, JSP, Webpack, AJAX
- **Cloud & DevOps:** AWS (EC2, S3, Lambda, RDS, ECS Fargate), Docker, Jenkins, Kubernetes, Git, GitHub, Pivotal Cloud Foundry (PCF)
- **Databases:** MySQL, PostgreSQL, MongoDB, SQL Server, Oracle
- **Messaging & Event Processing:** Apache Kafka, RabbitMQ
- **Tools & Testing:** Maven, Gradle, IntelliJ, Eclipse, JIRA, SonarQube, JUnit, Mockito, Jest
- **Version Control & CI/CD:** Git, GitHub, Bitbucket, Jenkins CI/CD

Experience

TCF Bank

J2ee Java Developer

Minneapolis, MN, USA

10/2023 - Present

TCF Bank, a wholly owned subsidiary of TCF Financial Corporation, offers a web-based enterprise application that assists member banks in managing credit card transaction disputes for their cardholders. The application provides a secure credit card payment processing system developed using Spring Boot, integrating a third-party payment gateway for real-time transaction authorization. It leverages Spring Security for data protection and implements a RESTful API for efficient communication between the front end and back end. Enhanced reliability is ensured through robust error handling and logging mechanisms.

- Designed scalable architecture and led end-to-end development including estimation and implementation.
- Built responsive UI components using HTML5, CSS3, Angular, and Bootstrap, enhancing client-side validation and performance.
- Created single-page applications and structured JavaScript code using **Angular**; utilized **Bootstrap** for template-based UIs.
- Implemented **Java 1.8** features such as **Lambda Expressions**, **Functional Interfaces**, Streams for concise and readable code.
- Utilized **Docker** containers for deployment and implemented a Continuous Delivery pipeline.
- Developed applications using the **MVC** pattern with Spring Framework, integrating modules like **Spring Batch**, **Spring Boot**.
- Created scalable **microservices** using Spring Boot, designing, and exposing **RESTful APIs** to facilitate seamless integration and communication.
- Designed Hibernate persistence solutions and developed domain models with **JPA** and **Hibernate**.

- Utilized **JUnit** and **Maven** for application testing and build processes, while employing **Log4j** for error and performance logging.
- Used Git for source control and collaborative development in Agile teams.

INative Tech Solutions Pvt Ltd

Hyderabad, India

Jr. Java Developer

07/2021 - 07/2023

- **Implemented design** using key phases of the Software Development Life Cycle (SDLC), including development, testing, implementation, and maintenance support in a **Waterfall methodology**.
- Built dynamic UI interfaces using **HTML, CSS, JSP, and JavaScript**, improving user interaction and responsiveness.
- Achieved synchronization of multiple threads through **multithreading** and **exception handling**.
- **Utilized JSON** to parse data from the server to meet business requirements.
- **Developed web services** to send and receive XML/JSON requests and responses.
- **Applied core Java concepts** such as multithreading, exception handling, and collection APIs for dynamic memory management.
- Built applications with **Spring Framework modules** using **Spring MVC**.
- Consumed web services to interact with external interfaces, exchanging data via RESTful services.
- Executed SQL queries to retrieve and insert data using **Microsoft SQL Server**.
- Established database connectivity using **JDBC** for **MS SQL Server**.
- Implemented JUnit test cases for unit testing and end-to-end testing suites
- Collaborated in Agile sprints and used **Git** for version control and codebase synchronization across teams.

IICL Pvt Ltd

Hyderabad, India

Java Developer (intern)

08/2020 - 05/2021

- Designed technical documentation using UML (Use Case, Class, Sequence Diagrams) with Rational Rose.
- Developed core application modules using Spring MVC 3.0 architecture.
- Involved in injecting dependencies into code using Spring IOC module of Spring Framework
- Applied **J2EE design patterns** (Factory, DAO, Singleton, DTO, Business Delegate) to enforce clean application layering and reusability.
- Built UI screens using **JSP, HTML, and JavaScript**, enabling client-side validations and dynamic content rendering.
- Implemented AOP paradigm for modularity.
- Involved in the development of presentation layer and GUI framework in JSP, HTML and client side validations were done using JavaScript.
- Configured **DispatcherServlet** and Spring Beans via XML to support IoC and MVC flow in **Spring 2.5**
- Used AJAX for request response processing without reloading the complete page in the client side.

Education

Southern Arkansas University

Arkansas, USA

Master's Degree in Computer Science

08/2023 - 05/2025

Vidya Jyoti Institute of Technology

Hyderabad, India

Bachelor's Degree in Computer Science Engineering

07/2018 – 06/2022
