SUMMARY

Results-driven operations and data professional with a strong foundation in analytics, process improvement, and project management. Proven ability to lead high-impact initiatives, build scalable systems, and collaborate cross-functionally to drive operational efficiency and strategic outcomes. Adept at SQL, Excel modeling, and dashboard creation. Passionate about applying data-driven insights to mission-driven organizations and dynamic environments.

PROFESSIONAL EXPERIENCE

Business Data Analyst,

Fresh Ideas Management

Aug '24 — May '25

Saint Louis

- Extracted, cleaned, and analyzed data using SQL, Python, and Excel to support strategic operations and business decisions.
- Built scalable dashboards (Tableau, Power BI) to visualize performance metrics and operational KPIs.
- Partnered with marketing, finance, and operations teams to gather requirements and implement data-driven solutions.
- Collaborated with cross-functional stakeholders—including Operations, Data, and Strategic teams—to gather requirements, align priorities, and execute solutions that supported key business objectives.
- Conducted EDA and developed statistical models to identify trends, forecast outcomes, and support planning.
- Delivered presentations to stakeholders using visual storytelling and actionable insights. Additionally, I developed scalable SQL and Python pipelines for data integration and transformation across departments, while implementing Tableau metadata tagging to enhance dashboard clarity and data governance.
- Led cross-functional initiatives to streamline reporting systems and reduce manual processing time by 30%.
- Transformed raw data into actionable insights using statistical methods, leading to measurable performance improvements across teams.

Data Analyst,

Spectraforce Technologies

Jan '20 — Jul '22

Raleigh

- Developed and optimized SQL queries to extract, clean, and analyze large datasets across multiple platforms, supporting strategic planning and performance reporting.
- Streamlined manual reporting processes through Python and Excel automation, improving data delivery speed and accuracy. Also, engineered ETL workflows to integrate and transform telecom datasets, and maintained metadata documentation to support database traceability and regulatory compliance.
- Leveraged SQL for ad-hoc analysis and dashboard backend support, improving data accessibility and reporting turnaround time by 35%.
- Collaborated with cross-functional teams and external partners to manage full-cycle hiring and project execution.
- Supported business development through client interaction, process mapping, and market analysis.
- Proficient with operating systems such as Windows and Linux, and the MS Office Suite.
- Automated complex calculations and reporting processes using advanced formulas, pivot tables, and data validation in Excel/Google Sheets, reducing manual effort by 40%.

EDUCATION

Master in Data Science, Maryville University of Saint Louis (GPA: 4.0/4.0)

Aug '22 — May '24

Saint Louis

• Related Coursework:

Programming with Python, R, and SAS; Machine Learning with R and Python; Deep Learning with Python; Math Modeling with Microsoft Excel and Visual Basic Applications; Database Management with SQL, PSQL, and MySQL; Big Data Analytics with Apache Spark and PySpark; Text Mining and Text Analysis with Python; Predictive Modeling with R; Mathematics for AI; Capstone Research Project.

RESULTS DRIVEN OPERATIONS AND DATA PROFESSIONAL

Advanced Excel Certificate

Machine learning, Maryville University

ACADEMIC PROJECTS

OpenCV Image Processing

- Developed color detection algorithms and face anonymization/recognition tools for privacy protection and class attendance tracking.

SQL Data Explorations and Cleaning

- Advanced data exploration and cleaning techniques were executed to ensure data accuracy.

Excel Data Analyst Project

- Led full-cycle data analysis, from cleaning and manipulation to visualization, driving strategic decision-making.

Tableau Customer Analysis

- Conducted in-depth customer analysis and visualized key metrics to inform targeted marketing strategies

Python Web Scraping and Automation

- Created Python scripts for Amazon web scraping and automated cryptocurrency data retrieval for real-time market analysis.

R Predictive Modeling and Game Development

- Applied predictive modeling to datasets like Titanic in R and designed a Memory Hex game, showcasing data analysis and algorithmic problem-solving skills.

TECHNICAL SKILLS

- | | |
|-------------------------------|--|
| • Programming & Data Analysis | Python, R, SQL, SAS |
| • Machine Learning Techniques | TensorFlow, scikit-learn, CNNs, RNNs |
| • Statistical Methods | Cross-validation, Hyperparameter Tuning, Model Interpretation |
| • Data Visualization Tools | Tableau, Power BI, Effective Visualization Design |
| • Big Data & Data Management | Databricks, SQL, Pandas |
| • NLP & Text Analytics | Natural Language Processing (NLP) – Research & Development |
| • Development Environments | Jupyter Notebook, Google Colab, VS Code, Anaconda |
| • Office & Productivity Tools | Microsoft Excel (Advanced), PowerPoint, Word, Google Workspace |
| • Collaboration Tools | Excel Pivot Tables, Google Sheets, MS Teams, SharePoint |
