

Ritesh Bag | Software Engineer

Chicago, IL, USA | +1 (650) 417-3394 | ritesh16arp@gmail.com | [LinkedIn](#) | [GitHub](#)

SUMMARY

Driven **Software Engineer** with **3 years of experience** delivering scalable and reliable software solutions in fast-paced, collaborative environments. Experienced in designing and implementing modern application architectures, improving performance, and reducing deployment times. Adept at working in Agile teams, contributing to all development lifecycle phases, and aligning technology solutions with business needs. Recognized for strong problem-solving skills, attention to detail, and a commitment to continuous learning. Proven ability to mentor junior team members, enhance team productivity, and deliver high-quality results that improve system efficiency and user experience.

TECHNICAL SKILLS

Languages: Java, JavaScript, SQL, Python

Frameworks/Libraries: Scikit-Learn, Matplotlib, Seaborn, TensorFlow, Keras, Jupyter, Spring MVC, JSF, Hibernate, Node.js, React.js, Spring Boot, Microservices, Spring Security, Django, Flask, FastAPI, Pandas, NumPy

IDEs: NetBeans, IntelliJ IDEA, Eclipse, Visual Studio Code, PyCharm, Jupyter Notebook

J2EE Technologies: Servlets, JSP, JSTL, JavaBeans, JDBC

Web Technologies: HTML, CSS, JavaScript, Bootstrap, jQuery, Ajax, JSON, XML, RESTful APIs

Application Servers: Apache Tomcat, WebSphere, Gunicorn, Nginx, AWS, Azure

Cloud & Database: AWS (S3, Lambda, EC2), Azure (App Services, Storage), Google Cloud Platform, MySQL, PostgreSQL, MongoDB, NoSQL, SQLite

Build / Other Tools: UML, MS Visio, Maven, Gradle, JUnit, Jenkins, Docker, Kubernetes, Ansible

Tools: Git, GitHub, Jira, Trello, Bitbucket, GitLab, PyTest, Unittest, Selenium

Methodologies: SDLC, Agile, Waterfall

PROFESSIONAL EXPERIENCE

Cisco Systems, IL, USA

Aug 2024 - Current

Software Engineer

- Architected scalable microservices using Java, Spring Boot, and Spring Security to support a modular, event-driven system architecture.
- Transitioned monolithic applications to AWS cloud-native solutions (Lambda, EC2, S3), boosting system resilience and reducing operational overhead by 35%.
- Formulated and exposed secure RESTful APIs for real-time integration across enterprise platforms, facilitating seamless service communication.
- Assembled responsive, reusable front-end components in React.js, enhancing UX performance and reducing initial load time by 40%.
- Streamlined CI/CD processes using Jenkins, Docker, and Kubernetes, enabling automated deployments and decreasing release cycle times by 50%.
- Integrated OAuth 2.0 and JWT authentication for role-based access control across distributed systems, improving application security and compliance.
- Partnered with cross-functional teams through Agile ceremonies, contributing to sprint planning, grooming sessions, and iterative product delivery.
- Advised junior engineers through pair programming and code walkthroughs, promoting best practices in clean code and test-driven development.

Wipro, India

Jan 2022 – Dec 2022

Software Engineer

- Developed scalable enterprise-grade web applications for Fortune 500 clients using Spring MVC, Hibernate, and JSP, aligned with client-specific SLAs and Wipro's delivery standards.
- Enhanced backend performance for large-scale client systems by optimizing complex SQL queries on MySQL/PostgreSQL, achieving a 30% improvement in data retrieval times.
- Implemented responsive, cross-browser-compatible UIs using JavaScript, jQuery, and Bootstrap to support Wipro's global client base across retail, banking, and telecom domains.
- Executed test-driven development practices using JUnit and Maven, increasing test coverage and supporting CI/CD pipelines for seamless delivery.
- Managed application deployments on Apache Tomcat within a client's hybrid infrastructure, integrating logging and custom performance dashboards using ELK stack and Prometheus.
- Created detailed system and integration documentation, including UML diagrams, Visio workflows, and Confluence wikis to ensure transparency with clients and ease of handoff for global delivery teams.

BrainByte Infotech, India

Oct 2020 – Dec 2021

Data Analyst

- Interpreted and transformed large datasets into actionable insights using Python (Pandas, NumPy) and SQL, aiding strategic decisions for marketing and sales teams.
- Engineered machine learning pipelines for classification and clustering using Scikit-learn, TensorFlow, and Keras, leading to a 28% improvement in predictive accuracy.
- Deployed ML inference APIs via Flask and FastAPI, enabling real-time integration into client-facing applications.
- Illustrated data trends and performance indicators through Matplotlib, Seaborn, and Jupyter, improving executive dashboard adoption and reporting efficiency.
- Automated ETL workflows for daily reporting and anomaly detection, reducing manual intervention and enhancing data reliability.

EDUCATION

MS in Computer Science, specialization in Software Development

Jan 2023 - Dec 2024

Illinois Institute of Technology, Chicago, Illinois, United States
