SAN FRANCISCO, CA • (858) 442-0143 • RITESHKOTHARI416@GMAIL.COM • WWW.LINKEDIN.COM/IN/RITESH-KOTHARI-SD

EDUCATION

San Jose State University | Charles W. Davidson College of Engineering

San Jose, CA

B.S in Software Engineering | Minor in Business Administration

May 2025

RELEVANT COURSEWORK: Data Structures and Algorithms, Database Management Systems, Object Oriented Design, Information Security, Computer Networks, Software Engineering, Software Quality Engineering, Fundamental Management and Organizational Behavior, Accounting, Software Engineering Process Management, Computer and Human Interaction, Network Management, Enterprise Software, IoT Security

SKILLS: Java, Python, SQL, Microsoft Office, HTML, Node.js, React.js, JavaScript, Databases, APIs, Pandas, Data Analysis, AWS, Information Security Artificial Intelligence, Project Management, Agile, Tableau, Power BI, Automation, Cybersecurity, Excel, GitHub, Flexibility, Public Speaking

CERTIFICATIONS: Google Cybersecurity Professional, San Jose State University Fundamentals of Cybersecurity Certificate, CompTIA Security+ (In Progress)

WORK EXPERIENCE

GEOPOGO

September 2024 – Present

AI Software Development Intern

- Collected, cleaned, and standardized zoning and civic datasets from 20+ U.S. cities using **Python, Pandas, and NumPy**, resolving inconsistencies to improve training data quality and enable reliable AI model performance.
- Engineered backend **data pipelines** that integrated 3D architectural models with civic zoning data, transforming raw datasets into structured formats for high-accuracy spatial visualizations and urban planning scenarios.

STANFORD

July 2024 – October 2024

Information Technology Intern

- Automated** internal IT operations by building modular **Python** scripts and integrating third-party tools (**Zapier, Google Apps Script**), eliminating repetitive tasks and improving team efficiency across departments.
- Prototyped** AI-powered automation workflows using **OpenAI APIs** and **NLP** techniques (e.g., content summarization), accelerating knowledge sharing and boosting operational productivity.
- Enhanced digital visibility by implementing **Search Engine Optimization** best practices—keyword mapping, metadata optimization, and **Google Analytics**-driven insights—resulting in improved search rankings and discoverability.

BEATS BY DRE

Jul. 2024 – Aug. 2024

Consumer Insights Data Analytics Intern

- Led **sentiment analysis** on **5,000+** customer reviews using **Python, Pandas, NumPy**, and **TextBlob** to uncover key satisfaction drivers and product pain points, directly informing strategic product decisions.
- Executed in-depth **exploratory data analysis** with **Matplotlib** and **Seaborn**, revealing correlations between customer sentiment, feature usage, and demographic trends to guide targeted improvements.
- Applied advanced **NLP** techniques to extract recurring themes and summarize qualitative feedback, enabling data-driven decisions across marketing and product teams through actionable customer insights.

PHONE.COM

June 2023 – August 2023

Database and Billing Intern

- Revamped the billing audit process by building an end-to-end **automation** pipeline using **Python** and **SQL**, validating transactional records across thousands of customer accounts, and recouping **\$50,000+** in overcharges while saving **50+ hours** of manual work.
- Uncovered key behavioral and usage trends by **analyzing customer data, delivering insights** that directly shaped product strategy, boosting retention, and driving revenue growth.
- Streamlined** team workflows by implementing **Agile methodologies** (daily standups, sprint retrospectives, Jira boards), improving project velocity, and maintaining alignment with evolving business objectives.

PROJECTS

SMART HOME SECURITY SYSTEM

Jan. 2025

- Developed an AI-powered biometric security system utilizing machine learning, **OpenCV**, and **TensorFlow** for adaptive facial recognition, integrated with IoT-enabled smart locks to deliver secure, frictionless authentication for smart home environments.
- Engineered a production-grade **FastAPI backend** with **MongoDB**, storing encrypted facial embeddings and implementing JWT-based authentication, **role-based access control** (RBAC), and comprehensive audit logging to ensure secure remote access and compliance with cybersecurity best practices.

SCANSLATE

Sep. 2024

- Built a cross-platform mobile app using **React Native, Firebase, and Node.js** to scan real-world objects and automatically generate interactive study flashcards, helping students, travelers, and self-learners transform their physical environment into personalized learning materials
- Led **Agile development** across biweekly sprints—managing sprint planning, backlog grooming, and scrum meetings—to prioritize features and deliver a user-centered product on schedule.
