

Rithvik Segu | Data Analyst | Data Engineer | Bi Developer

Location: NY, USA | Phone: +1 315-744-6865 | Email: srithvik219@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Detail-oriented and results-driven Data Analyst with 3+ years of experience delivering actionable insights, optimizing ETL pipelines, and building predictive models to support strategic business decisions in banking, healthcare, and consumer electronics. Proficient in Python, SQL, Tableau, and Power BI with hands-on experience in cloud platforms (AWS, Azure) and big data technologies like Apache Spark. Demonstrated success in improving operational efficiency, automating reporting workflows, and ensuring compliance with HIPAA, SEC, and FINRA standards. Skilled in stakeholder communication and cross-functional collaboration. Proven ability to work across global teams and deliver business intelligence solutions under tight deadlines. Seeking to leverage analytical expertise and business acumen in a data-driven organization.

TECHNICAL SKILLS

Languages & Tools	Python (pandas, NumPy, scikit-learn, matplotlib, seaborn), SQL (MySQL, PostgreSQL), Excel (PivotTables, VLOOKUP), Git, Jupyter Notebooks
Data Visualization	Tableau, Power BI, QuickSight
Databases	MySQL, SQL Server, MongoDB
Data Engineering	ETL, Data Cleansing, Validation, Deduplication, Apache Spark, Databricks, Google BigQuery, DBT Cloud
Statistical & ML Methods	Regression, Random Forest, XGBoost, SVM, EDA, Feature Engineering
Cloud Platforms	AWS (S3, Glue, Athena), Azure (Data Lake, Synapse)
Compliance & Governance	HIPAA, SEC, FINRA
Other Skills	Report Automation, Dashboard Optimization, Market Research, Risk Scoring

WORK EXPERIENCE

Credit Suisse, New York, USA

Jul 2024 – Current

Data Analyst

- Engineered predictive models using scikit-learn to detect high-risk transactions, improving detection accuracy by 25% and reducing false positives by 15%.
- Automated compliance reporting and transaction flagging workflows, reducing manual labor by 40%.
- Designed interactive dashboards (Tableau, Power BI) to monitor real-time metrics such as compliance risk scores and flagged transactions.
- Consolidated internal and external data into a unified platform using AWS Redshift and Azure Data Lake.
- Collaborated with ML engineers to enhance anomaly detection algorithms and real-time alerting.
- Developed a risk-scoring algorithm, reducing high-risk transaction review time by 35%.
- Led the migration of legacy compliance data systems to a modern cloud-based infrastructure.
- Conducted root cause analysis for transaction failures, contributing to a 20% reduction in resolution time.
- Partnered with cross-functional teams to define KPIs and compliance benchmarks for executive reporting.
- Created automated alert systems based on rule-based and ML-driven logic to flag anomalies.

Credit Suisse, New York, USA

Jan 2024 – May 2024

Data Analyst Intern

- Built and optimized ETL pipelines using Python, SQL, and Apache Spark.
- Conducted EDA on customer data to detect trends critical for compliance teams.
- Contributed to Random Forest models for classifying financial transactions.
- Integrated KYC and transactional data with external regulatory sources.
- Created data dictionaries and lineage documentation for smoother onboarding and regulatory reviews.
- Assisted in deploying production-grade dashboards with live data streams for compliance managers.

CitiusTech, Mumbai, India

May 2021 – Jul 2022

Data Engineer

- Developed ETL pipelines for healthcare data, enabling FHIR-compliant interoperability.
- Ensured HIPAA compliance through encryption and secure cloud storage using AWS and Azure.
- Built APIs and integrated third-party vendor systems to support health app onboarding.
- Delivered cloud-based solutions aligned with CMS Interoperability Rule.
- Collaborated with clinical teams to create data visualizations on patient outcomes and provider performance.
- Streamlined claims processing data flows, reducing processing delays by 30%.
- Implemented QA scripts to validate data accuracy and consistency across sources.

Data Analyst

- Conducted market segmentation and pricing analysis, increasing product sales by 15%.
- Automated ETL for survey and social media data to achieve 97% data accuracy.
- Created dashboards (Power BI, Tableau) for marketing performance tracking.
- Applied statistical modeling to identify key purchase drivers.
- Conducted A/B testing on promotional campaigns to assess ROI.
- Built predictive models to forecast seasonal demand across regions.
- Presented data-driven recommendations to senior leadership to inform marketing spend.

PROJECTS

AWS-Powered Stock Market Analysis | *Feb 2024 – May 2024*

- Utilized AWS S3, Glue, Athena, and QuickSight to process and visualize 26,000+ stock market records.
- Built interactive dashboards highlighting trends, price movements, and sector-based performance indicators.

Revitalizing Publisher Data Systems | *Sep 2023 – Dec 2023*

- Engineered ETL pipelines to migrate structured/unstructured data from Azure Blob Storage and AWS S3 to Snowflake.
- Cut data processing time by 40% and crafted Power BI dashboards for real-time performance tracking and KPI monitoring.

Image Captioning using CNN and LSTM | *Feb 2023 – May 2023*

- Constructed an image captioning model using VGG-16 for feature extraction and LSTM for sequence generation.
- Evaluated model accuracy using BLEU scores, achieving high-quality auto-generated image descriptions.

Healthcare Data Analysis | *Sep 2022 – Dec 2022*

- Explored 7,500+ healthcare records using Python (Pandas, NumPy, Seaborn) to identify cost trends among smokers vs. non-smokers.
- Discovered 70% higher costs among smokers and achieved 86% predictive model accuracy with regression techniques.

EDUCATION

Syracuse University, NY, USA**Master of Science in Applied Data Science**, 05/2024**VIT, Vellore, India****Bachelor of Technology in Electronics & Communication Engineering**, 05/2022

CERTIFICATIONS

- **AWS Certified Cloud Practitioner**, Amazon Web Services — *Earned: 2023*
- **Microsoft Certified: Azure Data Engineer Associate**, Microsoft — *Earned: 2023*
