EDUCATION

The University of Texas at Arlington

Master in Computer and Information Science

GPA: 3.9

May 2025

Don Bosco college of Engineering

Bachelor in Computer Science

GPA: 3.6

Jul 2023

TECHNICAL SKILLS

Languages: Java, Python, C++, JavaScript, Kotlin, SQL

Web Technologies: React, Rest API, FastAPI, HTML, PHP, TypeScript, Angular, Selenium

Cloud Technologies: AWS, Google Cloud Platform, Microsoft Azure, Terraform, Docker, Kubernetes

AI/ML: PyTorch, NLP, Scikit-Learn, Flask, TensorFlow, OpenCV, CNN, RNN, LSTM

EXPERIENCE

Software Developer

Aug 2025 – Present

Kramer America

Apopka, Florida

- Modernized internal tracking and invoicing tools in **Python and Azure SQL**, enhancing system performance
- Automated error reporting and email alerts, cutting manual effort by **40%**
- Collaborated with cross-functional teams to clarify requirements and deliver effective solutions

Research Engineer/GTA

April 2024 – May 2025

The University of Texas at Arlington

Arlington, Texas

- Guided **60+ students** in developing effective debugging strategies, improving unit test coverage by **15%**
- Conducted weekly office hours, resolving **50+ student** queries on **JUnit, Selenium, and PyTest**
- Streamlined grading for **100+ assignments and exams**, ensuring timely and consistent evaluation

Software Development Engineer (Co-op)

Jun 2022 – Jun 2023

CodeRelix

Margao, Goa

- Developed a full-stack web app with **React.js, Node.js, and Spring**, reducing load time by 20%
- Integrated RESTful and third-party APIs to optimize data access, cutting retrieval time by 30%
- Improved code reliability by 40% through comprehensive testing with JUnit and Mocha

Frontend Engineer (Internship)

Jan 2022 – May 2022

Umang Technologies

Margao, Goa

- Accelerated API response times by 20% through **Laravel**-based web app development and maintenance
- Led collaboration with a 10-person team, coordinating 100+ Git commits to optimize version control
- Streamlined API interactions using Angular, cutting response times by 25% and enhancing data retrieval speed

TECHNICAL PROJECTS

Cat FactNest | *React, FastAPI, SQLite, JWT, Python, Vercel, Render, GitHub Actions*

Feb 2025

- Engineered a full-stack application with **FastAPI** and **React**, enabling authenticated users to fetch, store, search, sort, and delete cat facts via a modern UI and RESTful APIs
- Implemented secure **JWT**-based login for adding, deleting, and syncing external data
- Set up **CI/CD pipeline** via GitHub for seamless deployment to **Render** (backend) and **Vercel** (frontend)
- Wrote async **Python scripts** to fetch and store unique facts from external API

Musiqi | *ReactJS, Shazam API, Selenium*

Feb 2025

- Streamlined semantic search queries in music library application by implementing vector search-based retrieval, improving query relevance by 40% and establishing more targeted music recommendations
- Constructed the backend with NodeJS, achieving a 25% reduction and ensuring smoother user experience
- Executed UI testing with Selenium, reducing user-reported bugs by 20% and improving application stability

LearnSketch | *Python, Kotlin, Android Development, MongoDB*

Jul 2024

- Attained a user-centric mobile app that leverages advanced image recognition and Machine Learning techniques to identify discrepancies in artist outputs, leading to 40% less time spent on revisions and increased client satisfaction
- Minimized sketch inaccuracies by 15%, improving user satisfaction and efficiency in art projects
- Optimized the app's performance, reducing the app's load time by 40%, ensuring smooth functionality
