SUMMARY

Backend-leaning Software Engineer (~3 years) building Java microservices and event-driven systems at production scale. I design and ship fault-tolerant services, instrument and analyze systems with logs/metrics, and reduce incident MTTR through clean code and solid operational hygiene. Comfortable with distributed messaging (Kafka), NoSQL (Cassandra with time-series and key-based access), containers (Docker/Kubernetes), and CI/CD. Known for clear docs, pragmatic designs, and fast, reliable delivery.

CORE STRENGTHS

Distributed Systems • Observability & Diagnostics • REST API Design • Event-Driven Architectures • Data Modeling for Time-series & Key-value Workloads • Performance/Latency Tuning • Secure Service Development • CI/CD & Release Engineering • Cross-team Collaboration & Code Reviews

TECHNOLOGIES

Languages: Java (primary), Python, C#, JavaScript/TypeScript

Frameworks: Spring Boot, Spring Security, Spring Data JPA, Play, Hibernate

Messaging & APIs: Kafka, REST, Swagger/OpenAPI, (basic) SOAP

Data: Cassandra (NoSQL), (working knowledge) MongoDB

Cloud/DevOps: Docker, Kubernetes, Jenkins, Terraform, Ansible, AWS (CodePipeline/CodeDeploy/S3/SNS/SQS), Azure DevOps, OpenShift

Observability & Tooling: Grafana, Splunk, Git, Postman, JIRA

Practices: Agile/Scrum, CI/CD, Unit/Integration Testing, Security Scanning, On-call/Incident Hygiene

PROFESSIONAL EXPERIENCE

Marriott International

Nov 2024 - Present

Java Developer

MD, US

- Designed and deployed **5+ production microservices** (Spring Boot, some Play) for user-identity workflows using layered architecture, DTOs, validation—**cleaner maintenance** and **faster onboarding**.
- Built **20+ REST endpoints** with **OpenAPI 3.0**; shipped Swagger docs and Postman collections to speed consumer integration.
- Implemented **Kafka producers/consumers** with idempotency and **DLQ**; handled **~150k msgs/day** and **cut reprocessing ~50%**.
- Hardened services with **OAuth2/JWT**, unified error handling, and structured logging; integrated routine security scans.
- Evolved Cassandra access for time-series and **key-based reads/writes**, improving **p95 read latency ~20%**.
- Delivered an internal **Angular** ops dashboard for feature flags/alerts, reducing manual config edits by **~70%**.
- Drove team quality via **PR checklists/templates** and trunk-based workflows across 12 engineers; improved throughput and review consistency.
- Partnered with adjacent teams for requirements and design reviews; contributed runbooks and docs that **lowered MTTR ~30–40%** on key services.

Infosys

Oct 2020 - May 2022

Systems Engineer

Hyderabad, India

- Resolved daily client requests and coordinated with dev teams to maintain **high service availability** and satisfaction.
- Automated backups and deployment workflows (**CI/CD**), reducing **release time ~30%** and **rollback <10 min**.
- Developed Microsoft Dynamics plugins and managed deployments to extend platform capabilities.
- Led targeted legacy migrations, retiring **10+ brittle jobs** and cutting monthly break/fix by **~25%**.
- Wrote documentation and mentored new team members to standardize support practices.

Infosys

Jan 2020 - Mar 2020

Software Development Engineer Intern

Mysore, India

- Built a full-stack web app (**ASP.NET Core, SQL Server, Node.js**) with **>80% unit test coverage**.
- Authored Azure Functions-based REST APIs with unit tests for modular service integration.

PUBLICATIONS & PROJECTS

- Under Prof., SRM Kattankulathur, India. Web Application for Parking Guidance. IJEAT Journal

Nov 2019 - Apr 2020

EDUCATION

Missouri Institute of Science and Technology, Rolla, MO

Aug 2022 - May 2024

Master of Science, Computer Science

GPA: 3.61/4.0

SRM Institute of Science and Technology, Kattankulathur, India

Aug 2016 - May 2020

Bachelor of Technology, Computer Science and Engineering

GPA: 7.3/10
