

RIYA MALPANI | Data Analyst

Hoboken, New Jersey, USA | +1(425-532-9884) | riya@aogjob.com | [LinkedIn](#)

SUMMARY

Data Analyst with **4+ years** of experience in data analysis, automation, and visualization. Adept at transforming raw data into actionable insights to drive business growth. Skilled in SQL, Python, Tableau, Power BI, and cloud technologies, optimizing data pipelines and enhancing decision-making. Strong ability to communicate complex insights to technical and non-technical stakeholders, enhancing operational efficiency and business outcomes.

EDUCATION

Master of Science in Business Analytics, University of New Haven, West Haven, CT, USA **Aug 2021 – Dec 2022**
B-Tech in Information Technology, NMIMS, Mukesh Patel School of Technology, Management & Engineering, Mumbai, INDIA **July 2016 – Aug 2020**

PROFESSIONAL EXPERIENCE (4+)

PTC | Data Analyst (Remote - Boston, MA) **Sep 2024 - Present**

- Developed interactive **Power BI** and **Tableau** dashboards, integrating multiple data sources and applying **DAX** calculations to enhance business intelligence. Processed **IoT data** and built real-time dashboards to optimize workflows and support **AR-related projects**.
- Optimized stakeholder **KPI** tracking, leading to a **20%** increase in product performance and operational efficiency through **ETL** processes.
- Automated **data pipelines** using **Python** and **Power Query**, reducing manual processing time by **40%**, resulting in faster decision-making.
- Analyzed customer interactions at **CXC**, identifying trends that improved presentation strategies by **20%**, leading to more effective marketing campaigns and higher customer engagement rates.
- Partnered with engineering and product teams to define data needs, streamlining workflows and boosting efficiency.

Japan Tobacco International | Data Analyst (Teaneck, NJ) **May 2024 - Aug 2024**

- Led **team meetings** and designed **Power BI** dashboards improving decision-making efficiency by **20%** with actionable insights and clear visualizations.
- Executed **complex SQL queries** to **extract, analyze, and manipulate** data from multiple databases, improving reporting accuracy.
- Automated data cleaning and statistical analysis with **Python**, cutting processing time by **35%** and boosting productivity.
- Built robust data models and optimized data analysis with complex **DAX queries**, improving efficiency by **25%**.
- Enhanced **Power BI reports** with advanced features, improving report utilization by **15%** and fostering better collaboration.

Tungsten Automation | Data Analyst (Remote - Irvine, CA) **Feb 2023 - Apr 2024**

- Reduced operational costs by **15%** through **SQL analysis** and **strategic insights**, identifying inefficiencies and optimizing workflows.
- Increased sales by **15%** in underperforming categories with **trend analysis** and **targeted recommendations**.
- Transformed millions of rows of raw data into structured, actionable insights using **SQL** and **Excel pivot tables**, cutting processing time by **50%**.
- Improved customer retention by **55%** through **A/B testing** and **targeted validation experiments**, refining strategies based on data-driven feedback.
- Developed **Power BI dashboards** for **customer demographics** and **e-commerce transactions**, boosting engagement by **20%**.
- Streamlined **ETL processes**, improving data migration efficiency from **Google Big Query** to **Azure** by **50%**.

University of New Haven | Data Analyst (West Haven, CT, USA) **Jan 2022 - Jul 2022**

- Constructed dynamic **Power BI dashboards**, increasing enrollment application processing efficiency by **25%**.
- Automated data transformation with **Python**, reducing manual processing by **40%** and ensuring consistent data quality.
- Designed **predictive models** to assess student application success rates, optimizing recruitment strategies and improving acceptance rates.
- Organized and maintained structured datasets, ensuring seamless **data flow** and accessibility for **cross-functional teams**.

Magna Infotech | Data Analyst (Mumbai, India) **Aug 2019 - May 2021**

- Developed SQL tools integrated with Snowflake, reducing decision-making time for stock management by **25%**.
- Standardized **monthly inventory reports** across 22 fulfillment centers, improving stocking accuracy while minimizing errors.
- Improved data accuracy by **18%** through consistent **quality checks, validation procedures, and process optimization**.
- Created **Power BI** dashboards that enabled stakeholders to make quick, informed decisions, enhancing operational efficiency.
- Analyzed **SQL** and **POS data**, identifying growth opportunities and driving a **10%** sales increase through recommendations.

TECHNICAL SKILLS

Programming & Data Processing:	Python (Pandas, NumPy, SciPy), SQL (Advanced Queries, Joins, Window Functions), R, Excel (VBA, Power Query)
Data Visualization & BI Tools:	Tableau, Power BI, Looker, Excel Dashboards, Matplotlib, Seaborn, Plotly
Statistical Analysis & Predictive Modeling:	Hypothesis Testing, A/B Testing, Time-Series Forecasting (ARIMA, Prophet), Regression Analysis, Machine Learning Basics (Random Forest, XGBoost)
Database Management:	SQL (PostgreSQL, MySQL, Snowflake, BigQuery, Redshift), NoSQL (MongoDB)
Data Wrangling & Transformation:	Power Query, DBT (Data Build Tool), Data Cleaning, Feature Engineering, Data Governance
Business Intelligence & Reporting:	KPI Monitoring, Trend Analysis, Marketing Analytics, Customer Segmentation
Automation & Scripting:	SQL Automation, Python Scripting for ETL, Web Scraping (BeautifulSoup, Selenium)
Cloud Technologies & Data Storage:	AWS (Glue, Lambda, S3, Redshift, Athena), Snowflake (Data Warehousing, Secure Data Sharing), Databricks (Lakehouse, MLflow)
Cloud & Big Data Technologies:	Google BigQuery, Snowflake, AWS Athena, Azure Synapse Analytics
Soft Skills & Business Acumen:	Data-Driven Decision Making, Stakeholder Communication, Agile (Jira, Confluence)

PROJECTS

Autonomous Drone Delivery System

- Designed and implemented an autonomous drone delivery system using Arduino, GPS, and sensors, reducing delivery time by **30%** and improving customer satisfaction by **25%**. Successfully demonstrated its feasibility for e-commerce, food, and postal services, with strong market demand.

Wireless Doorbell System

- Designed a wireless doorbell system using an RF module and Arduino UNO, with a **150-meter** range for remote activation. For home, shops, etc.

CERTIFICATIONS

- AWS Certified Data Analytics, Advanced SQL, Observer: Leadership Council Program , AnitaB.org (Grace Hopper Celebration Volunteer 2024)
