Objective

Dedicated and detail-oriented data analyst with a strong foundation in statistical analysis and data manipulation. Seeking a challenging position as a data analyst where I can leverage my analytical skills and technical expertise to extract meaningful insights from complex datasets. With a solid understanding of data visualization techniques and proficiency in SQL, Python, SAP, Tableau, and data visualization tools. I aim to contribute to the success of an organization by translating raw data into actionable strategies and providing valuable business recommendations.

Key Skills

- Telecommunications
- Excel
- SQL
- Python
- Tableau
- SAP
- Origami
- Compliance
- Data Analysis
- Statistical Analysis
- Organization
- Omniture
- Record Keeping
- Data Manipulation
- Data Visualization
- Safety Training
- Programming Languages
- Attention to Detail

Experience

Hewlett Packard

Product Planning Data Analyst 01/2024 to Current

- o Data analysis/analytics, specializing in areas such as finance, cost, marketing, logistics, and supply chain
- o Conducted data mapping and validations to ensure data accuracy and integrity for Business NoteBook product related data
- o Led data migration efforts, ensuring smooth transfer of large datasets across systems with minimal disruption
- o Leveraged SQL and Python to extract, transform, and validate large-scale operational and financial datasets for reporting and analysis.
- o Partnered with cross-functional teams to integrate SAP data with Tableau, Power BI, and Excel dashboards, ensuring consistent KPI tracking and executive reporting.
- o Project Manager for the Insider Program initiative

Sysco Corporation

EHSSA Data Analyst 06/2023 to 12/2023

- o Conducted comprehensive reviews of incident and litigation data to identify trends, patterns, and areas of improvement
- o Identified opportunities for enhancing safety measures based on data analysis and industry trends using software such as Origami, Excel, SAP, and Tableau
- o Monitored the effectiveness of implemented initiatives through data analysis, incident/injury tracking software (Origami), and feedback mechanisms
- o Leveraged SQL and Python to extract, transform, and validate large-scale operational and financial datasets for reporting and analysis.
- o Oversaw data quality efforts, including validation, cleansing, and standardization, to improve accuracy, consistency, and reliability of reporting, safety, supply chain, and logistics insights

REAAD Tech

Environmental Health & Safety Data Analyst 05/2018 to

- Accident Investigation
- Conflict Management
- Problem Solving
- SQL Database Management
- Data Mining and Extraction
- Data Governance

Education

Master of Science

Rice University
Houston, TX,
Data Science

Master of Science

Lamar University
Management Information Systems

MBA

Lamar University
Business Analytics

Bachelor of Science

Prairie View A&M University
Biology, Chemistry

Certifications

- Alteryx Foundational MicroCredential
- NIMS Courses: ICS 100, ICS 200, ICS 700, ICS 800
- American Red Cross First Aid/CPR/AED
- OSHA Education Center OSHA 30HR Construction
- OSHA Education Center OSHA 30HR General Industry
- University of Houston 40HR Project Management Education

05/2023

- Processed and analyzed healthcare data using Encompass warehouse methodologies, software, and programming languages like SQL and Python
- Conducted claims data mapping, dashboard creation, and validations to ensure data accuracy and integrity with software such as Tableau, Excel, and Power BI
- Led data migration efforts, ensuring accurate transfer of healthcare datasets between systems while maintaining data integrity and compliance
- Designed and maintained ad hoc reports and queries in SAP to support logistics, engineering, supply chain, and financial forecasting initiatives.

Pro-Vision Academy Administration

Data Analyst 08/2020 to 07/2022

- Developed comprehensive dashboards and reports using tools such as Tableau and Power BI, translating complex data sets into visually engaging insights for educators, administrators, and parents, and facilitating data-informed initiatives
- Utilized SQL, Python, and Machine Learning techniques to build predictive models for student enrollment, attendance, and dropout rates, enabling proactive interventions and achieving a 15% decrease in dropout rates over two academic years
- Conducted regular data audits and led data quality initiatives, implementing cleansing, validation, and standardization procedures that improved data accuracy by 25% and ensured reliable analysis
- Leveraged SAP ERP and SQL to extract, transform, and validate large-scale operational datasets for reporting and analysis.
