EDUCATION

UNIVERSITY OF COLORADO BOULDER – BOULDER, CO

December 2025

Bachelor of Arts in Computer Science, Minor in Creative Technology and Design

- *Relevant coursework: Data Structures & Algorithms, Database Design and Scaling, Advanced Software Design, Network and System Development, Object-Oriented Programming.*
- *Extracurriculars: Manager of Esports organization, Member of Google Student Developer Club*

TECHNICAL SKILLS

- **Programming & Development:** C++, C, Python, Java, JavaScript, HTML/CSS, React, Scala, Assembly, Git/GitHub
- **Cloud & Databases:** Google Cloud, Azure, AWS, MySQL, Oracle, MongoDB
- **Tools & Design:** Microsoft Office, Photoshop, Figma, Adobe Premiere Pro, Rhino CAD

PROFESSIONAL EXPERIENCE

VSP VISION – SACRAMENTO, CA

Project Integration Intern

June 2024 – December 2024

- Developed internal application features using JavaScript and C#, improving automation and data workflows.
- Designed and executed unit tests for multiple internal frameworks, increasing reliability and reducing regressions.
- Managed data through SQL and Excel-based solutions, streamlining reporting and portfolio generation.
- Administered and supported enterprise tools including Magnolia, ServiceNow, and CampusConnect, ensuring consistent uptime and user accessibility.

PROJECTS

ATC SIMULATOR

Head Developer

- Engineered an interactive air traffic control simulator by extending the open-source QFlightInstruments library with Qt/C++, transforming it from a visual demo into a fully controllable system.
- Designed and implemented intuitive UI components, validation systems, and resource management tools, enabling realistic ATC interactions and improving simulation accuracy.
- Integrated audio instructions and dynamic event handling to enhance user immersion and usability.
- Achieved top performance in course evaluation (170% score), demonstrating technical mastery and innovation in systems programming and simulation development.

Technologies: C++, Qt, Object-Oriented Programming (OOP), Event-Driven Programming, UI/UX Design

STOCK SENSEI

API Engineer, Full-Stack Developer

- Developed a stock trading simulator web application enabling users to practice risk-free trading with real-time news feeds and live market updates.
- Built and consumed RESTful APIs to provide stock data, account management, and portfolio tracking, leveraging Docker for containerized deployment.
- Implemented front-end trading logic and state management with modern JavaScript frameworks, ensuring seamless interaction between UI and back end.
- Enhanced testing reliability by designing automated test execution on launch, improving maintainability and deployment stability.
- Contributed to team-based Agile development, collaborating with 5+ developers via GitHub version control to deliver a production-ready application on Azure.

Technologies: JavaScript, REST APIs, Docker, Azure, HTML, CSS, Git/GitHub, Agile Development
